Thrifty Trees Produce Strong Orchards
Weakling Trees Never Do

Dear Friend:

Thrifty nursery trees of superior parentage and propagated by sensible, safe scientific methods are absolutely necessary if strong, vigorous, heavy-bearing, profitable, long-lived orchards are expected.

This thought has been in the minds of shrewd fruit growers for many years, but it was left to Stark Bro's to work out a plan and put into operation a safe and sane system of nursery production that would protect orchard planters - so after years of investigating, experimenting and testing the STARK RECORD BEARING STRAIN PLAN OF PROPAGATION was perfected.

You can no more grow high type, heavy bearing orchard trees from ordinary or weakling piece root, carelessly propagated nursery trees, than you can expect fine, big high type hogs to come from ordinary or runty, mongrel parents.

This fact should be kept in mind by every tree planter - whether he is planting a few trees in his back yard or a market orchard to produce an income to insure future financial independence.

Approaching this great problem carefully, Stark Bro's began their long battle for BETTER ORCHARD TREES many years ago. They were pioneers in this great work. Beginning in a small way, higher type parent trees were selected for propagating purposes, test orchards were established, careful scientific men were placed in charge and results watched and studied.

Twenty-five years ago Stark catalogs showed that we were carrying improved strains of Rome Beauty, Paragon, Stayman Winesap apple, Montmorency cherry etc. In our catalog at that time, we carried an article from Prof. C. S. Crandall, University of Illinois, who said: "There is need of a campaign of education among tree planters - quality is the all-important factor - quality means the backing of SOUND PARENTS OF KNOWN PRODUCTIVENESS. The first cost of a tree is insignificent."

(Please turn over)

We knew that Prof. Crandall was right and our work continued. Two years later we began the propagation of a solid red Gravenstein from a Washington orchard, a strain of Northern Spy from New Zealand, and an improved strain of Seckel pear from Illinois. From that date our experiments with special strains multiplied rapidly.

Today EVERY VARIETY On Stark Bro's List IS GROWN FROM A SELECT RECORD BEARING STRAIN - A PROVEN IMPROVEMENT ON THE ORIGINAL VARIETY - yet today we continue our search for improved strains - and when one is found that shows improvement over our present strain our propagation is changed. As a result our list of varieties is constantly being improved. This is expensive but it makes Stark Record Bearing Strain trees the FINEST, MOST PROFITABLE TREES OBTAINABLE.

The time has now come when the whole scientific world knows Stark Bro's claims for RECORD BEARING STRAINS are well founded. They know that the old time ideas of ordinary propagation are dangerous and out of date - and the grower who thinks - who studies - knows that success in fruit growing depends largely upon the nurseryman who grows the trees he plants.

You can readily see that such a far-reaching time-consuming plan could, of course, only be perfected by a long-establised nursery, for IT TAKES MANY YEARS TO SEARCH OUT, LOCATE, TEST AND PROVE RECORD BEARING QUALITIES. We spent OVER THIRTY YEARS in intensive research work and a tremendous amount of money in acquiring our present Record Bearing strains - but the time and the money were well spent, because the great orchard industry of which we are a part, has improved and profited through our work.

We urge those who plant trees to pay less attention to price - we urge the planting of SAFE TREES, even if the cost is a little more - we urge growers to think before they jeopardize the success of their plantings and years of work with trees that do not measure up to the 1934 scientific standard of propagation and production. Stark trees are now all grown from Record Bearing Strains - they are SAFE - they are the best that science, good soils and up-to-the-minute methods can produce. Stark customers can plant their trees with 100% assurance of succes if they do their part - and we solicit the business of careful thinking people everywhere.

Our Price List, Catalog and Order Blank are inclosed. Make out YOUR order today and mail it promptly. Our prices are still at last year's lowest depression level - we have not raised prices yet, but we too may have to change them soon, so make your reservation order at once.

Your order will have the care of careful, conscientious men of long experience, men whose greatest desire is to see Stark customers satisfied.

Sincerely,

E. W. Reed

Golden Delicious — World's Best Apple

Golden Delicious The Golden Apple That Has Amazed the World!

11-Year-Old Golden Delicious Tree in Mr. Chambers' Orchard, Delaware Co., Ohio, bore 10 bushels Wonderful Apples.

"Finest Flavored Apple in ALL the WORLD!"

"Golden Delicious is the finest flavored apple in all the world." It is a remarkably Large, Late Winter, Waxen-Golden Apple with a rich, alluring beauty that tempts the buyer and **commands Record-Breaking High Prices on every market every year.** A great commercial and family apple "ONCE TASTED, ALWAYS WANTED!"

It is supreme as an eating apple—and perfection for cooking, canning and cider.

Golden Delicious averages as large as Red Stark Delicious. A FAR SUPERIOR KEEPER to Grimes. It is a big, glossy, Golden Yellow apple, slightly conical in shape (somewhat like Stark Delicious), is blessed with a Rich, Creamy Yellow Flesh, suffused with a slight hint of Oranges—Crisp, Firm, with a Sparkling, Tangful Flavor much like that of a crisp, perfect Bartlett Pear. No apple ever known or grown has so instantly caught the public's favor—BECAUSE OF FLAVOR!

"BEARS When Apples Are Scarcest and Prices Highest"

"Escapes All Spring Frosts"

The remarkable record of Golden Delicious **bearing year after year everywhere,** in the face of frosts and weather conditions that reduce or ruin the crops of other varieties, is simply amazing.

Here are just a few of the enthusiastic reports that are pouring in on us from delighted growers:—

"This Spring 3 heavy frosts killed all my other varieties **except Golden Delicious.** They brought me 50 per cent more than others," declares G. C. Roberts, Columbiana, Co., **OHIO.** "My heavy crop of Golden Delicious will be the **ONLY** apples I'll harvest this year. All others very light," states Kalalanta Orchards, Macon Co., **N. CAR.** "My Golden Delicious were the **ONLY** trees producing a crop this year. They bring me **100% MORE MONEY** than my other varieties," states Zack Hodson, Shelby Co., **ILL.**

THE American Fruit Growers, Inc., are the Largest Orchardists in the world (headquarters—Pittsburgh, Penn.). Their Wenatchee **Regional Supervisor, Mr. Earl Barnhill,** reports a wonderful Stark's Golden Delicious crop for last year:—

"We harvested **1220 (Twelve Hundred and Twenty) packed bushel boxes of Stark's Golden Delicious apples from 130 trees on less than 2 acres.**

"We sold this crop for $5,583.00 (Five Thousand, Five Hundred and Eighty Three Dollars) f.o.b. cars—an average of $4.57 per bushel!"

This gave them a net income of $42.95 per tree—or nearly $3,000.00 (Three Thousand Dollars) per acre!

Mr. Barnhill further states:—

"We have closely observed the Stark's Golden Delicious variety for the past 5 years. Stark's Golden Delicious is—

"The Heaviest Bearing of All Commercial Varieties

—even heavier than Rome Beauty, Black Ben or Ben Davis. The trees are strong and healthy, apparently quite **frost-resistant** and **they bear a commercial load of high quality fruit on one-year wood,** being the **only variety** that does this. **The Apples never get mealy. We are particularly pleased with the size and quality of the fruit.** This big crop of 1220 bu. off 130 trees was 71-8/10 per cent Extra Fancy 46-4/10 per cent of the apples ran 64 apples to the bushel—or larger size."

Wonderful HARDY Tree Disease Resistant—Vigorous

Bore at 2 yrs. old in 33 States

Golden Delicious trees are amazingly vigorous, fast growers, do not blight and are wonderfully disease resistant. **They possess the abounding vitality that makes them bear young and grow fast at the same time.** Shape is ideal for modified leader type—requires little pruning. Limbs very strong—do not break under tremendous loads of fruit. Bear tremendous crops **EVERY YEAR.** Apples ripen late, hang well and do not drop. Often bears at 2 years old.

Little Orchards Make More Money than Big Farms

Pays Better than Cattle Raising or Grain Growing

Adolph Luksdorf, Lane Co., OREGON, bought 10 acres, planted Stark Delicious, Stayman Winesap and Grimes—sold it just coming into bearing for 5½ times amount he paid for it. He is now planning an orchard of 90 acres which he will plant to Stark Delicious (30 per cent), and Golden Delicious (30 per cent). He declares, "Orcharding pays better than either cattle raising or grain growing."

More Profit in Apples Than in an Orange Grove

Jas. Sharpe, former R. R. fireman and farmer, Morris Co., KANSAS, reports his leading Stark Tree varieties Stark Delicious, Jonathan, Grimes Golden and Winesap. He has sold about $15,000.00 worth of apples from 40 acres each year for 3 straight years—land bought for $150 an acre and now worth $500.00 per acre. He declares:—**"There is more profit in a well-cared-for apple orchard than in a Florida orange grove!"**

Pays 10 Times as Much as Corn or Cotton Growing

Arthur H. Thompson, Lee Co., ARKANSAS, formerly in cotton and lumber business, has been raising fruit for ten years. His leading varieties are Stark Delicious, Stark King David, and Stayman Winesap. Also he has young Golden Delicious. Single Stark Delicious trees have yielded him 25 bushels in a year. He writes: "My orchard has paid me ten times more per acre than anything else, such as corn or cotton."

Genuine Golden Delicious Trees Obtainable ONLY from Stark Bro's, Louisiana, Mo.

"Golden Delicious Makes You Dollars Where Any Other Apple Makes You Dimes!"

J. O. Staats, Vermillion Co., INDIANA, in 5-yr.-old Golden Delicious orchard, loaded with fruit.

—Garland J. Hopkins.

"I WENT down in Virginia in 1911 and paid $23,240.00 for this land—and, after planting it to Stark Trees, especially Golden Delicious, cleaned everything up in 6 years off my orchard profits. Off this 75½ acres—about 60 acres in orchard—I made 16 per cent net profit per year on the average, in addition to supporting my family.

G. Hopkins in young Stark Golden Delicious orchard in VIRGINIA bearing 10,000 bu.

"To show you how Golden Delicious has performed for me. Last year (the year of the terrible drouth) most of my varieties failed to set any crop. BUT—my 600 Golden Delicious 9 yrs. old and my 600 Golden Delicious 6 yrs. old BORE 10,000 BUSHELS. Many of my young Golden Delicious Trees yielded 18 to 20 bushels each. **That one year's crop** (in a very bad year for most varieties) **alone paid for my orchard!** That's why I say Golden Delicious will make a dollar for every grower who plants it for every dime he will ever get from a tree of any other variety of apple!"

"Will Make $50 An Acre Land Worth $1,000.00!"

J. O. Staats, Vermillion Co. Indiana: "My 250 Stark Golden Delicious bought from you 5 years ago loaded this year—many bearing 5 bu. each. I can take $50 an acre land, plant it to Golden Delicious and in 10 years it will be worth $1,000.00 an acre!" (See photo above.)

$2.00 More Per Bushel Than Rome Beauties

W. D. Giesler, Washington, reports:—**"Apple growers who will be making big money 10 years from now will be those who plant Golden Delicious, Starking and Stark's Red Delicious.**

"I received $3.97 per bu. average for my Stark Golden Delicious apples, $2.00 bu. above Rome and Grimes Golden."

Stark's Golden Delicious Orchard of Spencer Waldron, Calhoun Co., Illinois—began bearing at 4 years and had BIG PROFIT CROPS every year.

Golden Delicious Makes Rough Hill Land Worth $1,000 an Acre!

The Story of SPENCER WALDRON, Orchardist, Calhoun Co., Illinois reads like a romance.

About a generation ago, a young man trudged into the hills of Calhoun County, with a mere $40 in his pocket—and an ambition in his heart.

He got a job the day he arrived. And, as he worked, he looked about him. He saw that the **only** farmers in that hilly country making money raised apples. He noticed, too, that those who made the MOST money, brought the BEST apples to market.

"So," he said to us, "while I had early made up my mind to own an orchard some day, I also said to myself that I would grow only the BEST varieties of apples.

"I went into the orchard business because I considered it ABSOLUTELY SAFE—I KNOW that if you pick good land, plant GOOD trees and give them good care, THERE IS ABSOLUTELY NO WAY YOU CAN FAIL—in the long run.

"Stark Bro's were just introducing Stark's Golden Delicious apple the year I bought my first land—and they strongly advised my planting a lot of them—although some of my neighbors were mighty dubious about any new variety.

"I followed Stark Bro's advice and planted my first orchard largely to Stark's Golden Delicious, Stark Red Delicious, Jonathan, Double-Life Grimes Golden and Willow Twig apples. Later on, when Stark Bro's introduced Starking, the "Double-Red" Delicious, I planted a lot of that variety, too. Those six HIGH-QUALITY APPLES and a moderate quantity of the Stark Early Elberta and J. H. Hale Peach trees today make up my 250-acre orchards.

"Those Golden Delicious began bearing very young and have borne fine crops of HIGHEST MARKET PRICED APPLES every year ever since. In many years, like 1929, when **other varieties were** killed by frost, my Stark's **Golden Delicious bore** tremendous crops—9-year-old trees bearing 10 bushels each, on the average.

BECAUSE I PLANTED SUCH A LARGE NUMBER OF STARK'S GOLDEN DELICIOUS in my very first orchard, I began to pick REAL MONEY CROPS starting the fourth year."

At this time, Mr. Waldron's trees range from 2 to 12 years old—only half of them old enough to bear—but his orchard that is bearing prompts him to conservatively state that he will NET 20 PER CENT PER YEAR ON $1,000 PER ACRE valuation as all the trees come into bearing.

Prices and Order Blank, Pages 11, 12 and 16—Golden Delicious Trees Sold ONLY by Stark Bro's

Actual Size Average Starking Apple

Genuine STARKING Apple Trees Can Be Obtained ONLY from Stark Bro's

STARKING ..the Sensational New Double-Red Stark Delicious

Sold ONLY by Stark Bro's

A NOTED Horticulturist told us, some years ago: "A New Jersey Orchardist has an amazing Stark Delicious tree. **One limb of this Stark Delicious tree is loaded every year with apples that get** RED ALL OVER IN AUGUST, **a month before ripening, when the apples on the other limbs are still green!"**

We investigated and **bought this tree for $6,000.00,** erected a cage around it for protection and began a series of tests to PROVE that scions cut from that limb **would** produce trees that **would** bear apples having that same early-coloring, super-color, double-red characteristic.

During all the years of tests and inspections by scores of State Horticulturists and noted fruit Growers, STARKING exceeded the "rosiest" expectations of all of us—has performed in such a way that it has **convinced** every State and National Horticulturist who has seen the Original Tree and the succeeding generations of STARKING trees, that **it is a true bud-sport—** and produces by far the most superior strain of the famous Delicious apples.

"Every One of My 3-Yr.-Old Starkings Bore This Year!"

—reports Jos. A. Richartz, of Yakima. "The photos of my 3-year-old Starking trees show the magnificent crop that EVERY ONE of these trees bore this year —and EVERY apple had 100 per cent color—even those on ends of limbs bent to ground and entirely covered in the alfalfa. **All the apples were LARGE—most of them running** 64, 72 and 80 to the bushel.

Leading orchardists in this section are more enthusiastic than ever over Starking, not only its wonderful color and size but its ability to **bear considerably younger than Delicious.** Mr. Curtis Aller, Mgr. Yakima Fruit Growers Association visited my orchard a number of times and was very enthusiastic over the **splendid size, color and young bearing of Starking.** (Note—The Yakima Fruit Growers Association—"The Big Y"—has since ordered over 20,000 Starking Trees from us.)

"Shows Even More Color than Necessary for Fancy Grade!"

That's the positive statement of Prof. Roy E. Marshall, Assoc. Prof. in Horticulture, Michigan State College.

"The color of the STARKING apples even from the most shaded portion of the limb showed more color than is necessary for EXTRA FANCY GRADE.

"STARKING is a bud sport of Delicious having every tree and fruit characteristic of the latter, **PLUS SOLID RED COLOR.** It should yield like Delicious, **grade out better and command even better prices on apple markets than Delicious."**

Starking Sales 405% Greater Than Delicious

THOUGH introduced less than a generation ago, Starking is already far out-selling old Delicious **because far-seeing orchardists realize that Starking is a vastly improved Delicious.**

Last season, we sold 405 per cent more Starking trees than old Delicious —and except Golden Delicious, it has for years been by far our best seller.

Growers who **plant for profit** have planted and are planting Starking by the tens of thousands. In the Greatest American orchards, where Stark Delicious has for years been the GREATEST PROFIT MAKER for growers, Starking is being planted as no other apple was ever planted before!

"Won't Get Mealy!"

Prof. J. H. Gourley, Ohio, Chief Horticulture Dept. states:—"The Starking guaranteed red color assures fruit growers:— Early Picking, Firmer Fruit for **Longer Keeping** and Better Quality over a Longer Storage Season." (Won't Get Mealy—like old Delicious.)

"STARKING— A Super Delicious!"

Prof. T. J. Talbert, Mo. State Horticulturist states:—"I have seen Starking and **marveled at its early color** (in Aug.). It is a super-Delicious and will keep far through the winter **WITHOUT BECOMING MEALY!** It will be outstanding as a leader."

STARKING "Double-Red" Delicious, (*left*) not ripe but already RED. Regular DELICIOUS, (*right*) still GREEN. Both picked same day, (Aug. 31st), same orchard. Starking gets red long before it ripens, can be picked while "hard ripe", hence keeps juicy months longer.

You Can Obtain Genuine STARKING Trees ONLY from Stark Bro's, Louisiana, Mo.

"Finest Carload of Apples Ever Shipped in America—All Starking

LEO C. ANTLES, Orchard Production Manager, AMERICAN FRUIT GROWERS, INC., jubilantly sent us this photograph of the shipment of this, the finest carload of apples that ever left the far-famed Wenatchee Valley—one of the richest orchard sections in all the World!

He declares:—**"Apple Growers and Everyone say This Carload of Starking Is Beginning of New Epoch in the Apple Industry!"**

These Apples Brought the Growers $5.00 Per Bushel F.O.B. Cars!

—When Delicious were bringing $2.50 to $3.00 per bushel. The higher all-over color, firmer texture and longer keeping ability make **Starking eagerly bought at 100 per cent higher prices!**

The ORIGINAL STARKING TREE—a genuine Delicious with one limb all-over-red apples in August when balance of apples on tree were still green. This is the limb that caused us to pay $6,000.00 for the tree, which is now protected by burglar-proof cage.

The $6,000.00 STARKING Limb above, bearing the red apples, will carry a boy through College. Mr. Mood, in whose orchard we discovered STARKING, has set aside the $6,000.00 to send his young son to College.

"Starking Apples Well Colored—All Other Apples on Tree Green!"

declared Prof. Jos. Oskamp, N. Y. State Ext. Professor Pomology. "Starking exceeded my most optimistic expectations. To see the original **Sport Limb** of this tree **laden with well-colored apples long before picking time when the rest of the apples on the tree were still entirely green** was a sight worth coming many miles to see! There is no question about **STARKING** retaining this all-over-red color when propagated, because the fruit on the young **STARKING** trees in the same orchard was even deeper red than apples on Starking **sport limb."**

A. J. Heinicke, Professor Pomology, New York, wrote: "I am in entire accord with Prof. Oskamp regarding **STARKING!"**

Value of Early Coloring to All Growers

BECAUSE they **DO** color a beautiful, solid, **all-over-red, STARKING apples can be picked early—**To get the Highest "First-Delicious-on-Market" Prices. **They can be picked while still hard, crisp, full of juice—**and yet a Beautiful Blood Red **and Will Keep until Late Spring and never get dry or mealy—retaining full juice and crispness.**

Prof. Potter, New Hampshire State Horticulturist, states: "Beyond all doubt a **TRUE BUD SPORT.** I think that the change has been of such a nature that **the STARKING carries twice as many hereditary factors (red) as Delicious carries. This increased color will make it possible to pick earlier, which MAKES THE APPLES KEEP LONGER."**

Starking Wins the World's Highest Award

Prof. C. P. Close, U. S. Gov't. Pomologist and other Committee members of the American Pomological Society voted to confer the **Highest Honor of The Horticultural World** — the famous **WILDER MEDAL,** on the Starking apple.

Prof. Close said:—"The particular **VALUE** of Starking is in the **early red color** which makes it possible to pick and place the fruit in storage as soon as 'hard ripe'. This will not only lengthen its commercial life but **the fruit will NOT GET MEALY!"**

Representatives from N. Y. Exp. Station and N. Y. Agric. College, Cornell, under Original Limb of Starking Tree—Profs. Hedrick and Tukey, Geneva; Profs. Heinicke, Oskamp, Carrick and McDaniel, Cornell.

Prof. C. P. Close, U. S. Gov't. Pomologist Holding Winning Starking

PRICES and ORDER BLANK on Pages 11, 12 and 16

Early Red Bird Apple Above

Henry Clay

McIntosh Red (above)

Record Bearing Strain APPLES

Early Red Bird—A Gold Mine

"World's Earliest Red Apple." Most beautiful early apple. Ripens week ahead Yellow Transparent. Large, glowing scarlet fruit—best early apple quality. Remarkable, vigorous tree—hardy as an oak—great annual cropper. Our Record-Bearing Strain Early Red Bird Trees are propagated from best parent tree of known record. Prof. Sanders, Canadian Dept. Agric. says: "Earliest apple, young bearer. 15 acres Early Red Bird brought Mr. Shute $10,500.00. Mr. Adney, son-in-law of Originator (Mr. Sharpe of Nova Scotia) says: "Remarkable bearer, extremely hardy, never winter kills. **7 to 10 days earlier than any other apple." Sold ONLY by Stark Bro's.**

Henry Clay

(Trade Mark) **"World's Earliest Yellow Apple."** We propagate our trees through the original Henry Clay Tree discovered in Hopkins Co., Kentucky. Fruit looks like Maiden Blush but ripens 2 months earlier. Larger and better than Yellow Transparent. Ripens crop evenly and fruit can be marketed far earlier than any other yellow apple. Tree strong grower, spreading, regular and abundant bearer. "Most delicious early apple I ever tasted."—R. F. Rutledge, Tenn.

Early McIntosh

(Early Red Eating Apple.) A late introduction—a New, **VERY EARLY** maturing cross between McIntosh and Yellow Transparent. Originated at N. Y. Exper. Station, where it made a great record. Bore wonderfully in Stark-Burbank Test Orchards. Possesses McIntosh color, size and flesh characteristics. Ripens after Yellow Transparent. Great apple to plant to follow Early Red Bird on the high-price early markets.

Wilson Red June

Summer. Sold **ONLY** by Stark Bro's. We propagate all our trees through Original Wilson Red June Tree. Bears immense red-all-over apples, not a sign of stripe. Ripens just ahead of Summer Champion and goes on market when apples are scarce and high priced. Tree very hardy, withstanding hardest winters and coming through with fine crops. Wilson Red June and Summer Champion are undoubtedly the most beautiful summer apples. Sold for $8.00 a barrel.

Summer Champion

Late Summer Apple. Sold **ONLY** by Stark Bro's. We discovered the Original Summer Champion tree and all our propagation is through the Original Tree. Most beautiful, best quality, largest and best shipper of all Summer apples. A brilliant red apple of truly fine flavor. Ripens between Wilson Red June and Wealthy. Tree very hardy, good grower and heavy bearer. An ideal summer apple.

Wealthy

Fall. All our Wealthy trees are propagated from Zuercher's famous Wealthy Parent Tree. Amazingly hardy. Strong tree—bears young and regularly. Disease-free. Long-lived. Fruit brilliant red-striped, medium to large. Wonderful wine-like flavored flesh. Zestful juice. **The Record-Bearing Strain of WEALTHY can be obtained ONLY FROM STARK BRO'S. Most Profitable of all Fall Apples.**

Yellow Transparent

Early Summer Apple. Medium size, golden yellow fruit—hardy, young bearing tree. Our strain best, because propagated from Record-Bearing **OHIO** Yellow Transparent Tree—but, we recommend Henry Clay as better variety.

Double-Red Duchess

Early Summer Apple. A Stark introduction. Twice as red as Old Duchess Oldenburg. A real bud-sport that will bring great profit to Duchess growers—true Duchess quality with far greater market attractiveness.

McIntosh Red Stark Strain

Winter Apple. All our trees propagated from Parent tree in Orchard of A. E. Jansen, New York McIntosh King. This tree has a Record-Bearing of 51 bushels. The extra vigor is apparent in all Stark grown McIntosh Red Trees. The fruit is big with attractive crimson skin, delicate crisp aromatic flesh that is almost snow white. A fine long-lived tree, very hardy, strong grower and young bearer. A big Profit Maker.

Jonathan Stark's Young-Bearing Record-Bearing Strain

Winter Apple. A remarkable tree is the Parent of all our Jonathan Young-Bearing Trees. We discovered this tree in Missouri where it matured 20 apples when **ONLY 3 YEARS OLD**—and bore 90 apples when 4 years old—**NEVER MISSED A CROP SINCE.**

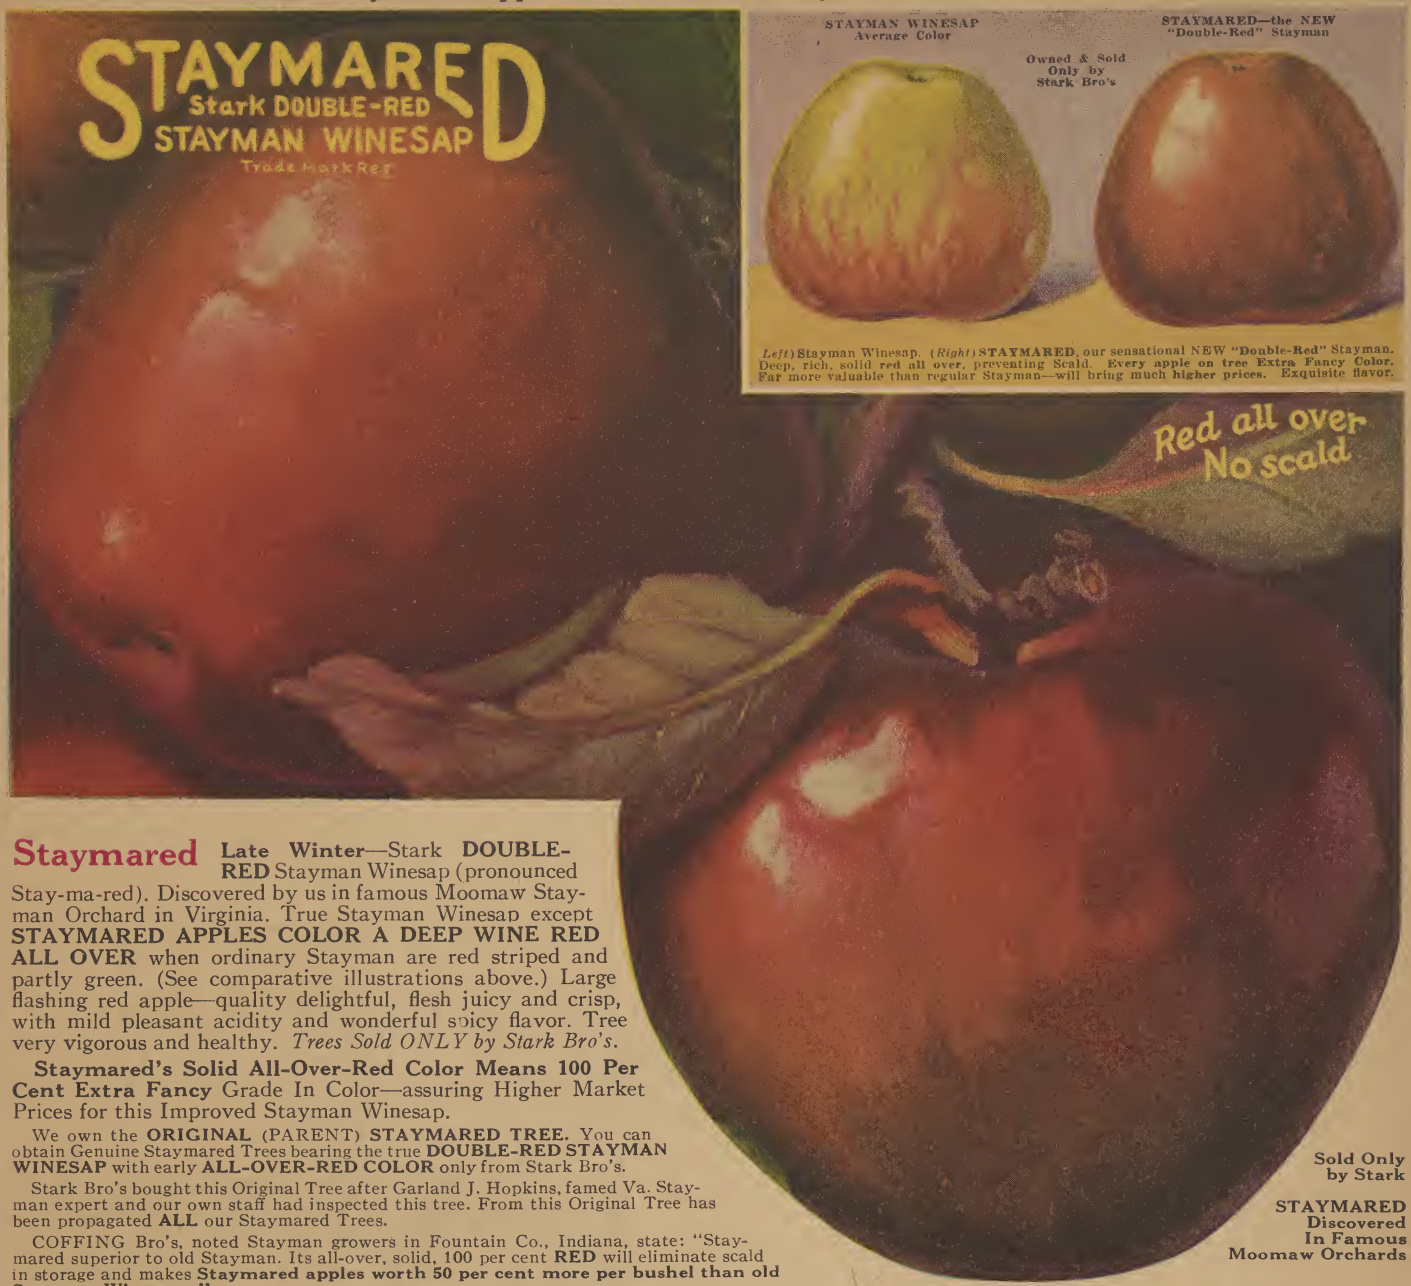
Jonathan is a fine apple—good size, bright red and possessing a spicy rich acid flavor and crisp flesh that makes it a universal favorite. The tree is adapted to wide varieties of soils—succeeds all through Central West, East, South, Northwest and as far North as Michigan. Is rather spreading in growth, hardy, long-lived—**AND OUR JONATHAN STRAIN BEARS YOUNG.** One of the greatest and surest money-makers for orchardists everywhere.

Jonathan—Young Bearing—A Big Profit Maker

Best of All Jonathan Strains

Stark Young Bearing JONATHAN

PRICE LIST and ORDER BLANK in Center of Book—Pages 11 and 16



Left) Stayman Winesap. *(Right)* **STAYMARED**, our sensational NEW "Double-Red" Stayman. Deep, rich, solid red all over, preventing Scald. **Every apple on tree Extra Fancy Color.** Far more valuable than regular Stayman—will bring much **higher prices.** Exquisite flavor.

Sold Only by Stark

STAYMARED Discovered In Famous Moomaw Orchards

Staymared

Late Winter—Stark **DOUBLE-RED** Stayman Winesap (pronounced Stay-ma-red). Discovered by us in famous Moomaw Stayman Orchard in Virginia. True Stayman Winesap except **STAYMARED APPLES COLOR A DEEP WINE RED ALL OVER** when ordinary Stayman are red striped and partly green. (See comparative illustrations above.) Large flashing red apple—quality delightful, flesh juicy and crisp, with mild pleasant acidity and wonderful spicy flavor. Tree very vigorous and healthy. *Trees Sold ONLY by Stark Bro's.*

Staymared's Solid All-Over-Red Color Means 100 Per Cent Extra Fancy Grade In Color—assuring Higher Market Prices for this Improved Stayman Winesap.

We own the **ORIGINAL** (PARENT) **STAYMARED TREE.** You can obtain Genuine Staymared Trees bearing the true **DOUBLE-RED STAYMAN WINESAP** with early **ALL-OVER-RED COLOR** only from Stark Bro's.

Stark Bro's bought this Original Tree after Garland J. Hopkins, famed Va. Stayman expert and our own staff had inspected this tree. From this Original Tree has been propagated **ALL** our Staymared Trees.

COFFING Bro's, noted Stayman growers in Fountain Co., Indiana, state: "Staymared superior to old Stayman. Its all-over, solid, 100 per cent **RED** will eliminate scald in storage and makes **Staymared apples worth 50 per cent more per bushel than old Stayman Winesaps."**

Stark Delicious

(Trade Mark). **The Original Tree Strain Obtainable ONLY From Stark Bro's.** The Late Winter "Dessert Apple Supreme." Introduced nearly 50 years ago by Stark Bro's and is the great, "big red apple with the five knobs" that has revolutionized the entire apple industry. Our Genuine **ORIGINAL TREE** Strain Stark Delicious Trees are fast growing, hardy, extremely resistant to disease, great pollenizers and regular bearers. They thrive and bear in any State in the Union and in any soil where apples will grow. Home orchardists, especially, should plant Genuine Stark Delicious trees. Just a few of these trees will provide the family with an abundance of these superb apples. The Improved Double-Red Delicious, **STARKING,** is better for commercial plantings.

Stayman Winesap

Stark Heavy Bearing Strain. Propagated from select Stayman tree in Shenandoah Valley, Va.—a tree noted for its high color, huge fruit and splendid tree characteristics. Fruit is large, with delightful quality, crisp flesh, juicy with mild, pleasing acidity and spicy flavor. The **DOUBLE-RED** Stayman, **STAYMARED,** is, however, far better for commercial plantings. Trees Sold ONLY by Stark Bro's.

Stark King David

(Trade Mark). A **winter** apple—cross of Jonathan and Winesap—colors earlier than Jonathan. Introduced by us 25 years ago. All trees propagated from wonderful Parent Tree grown from buds cut from Original King David Tree. Extremely young, heavy bearers. Fruit is an improved Jonathan—redder—and spicier quality. Tree hardy, blight resistant, long lived. Trees sold ONLY by Stark Bro's.

"Double-Life" Grimes Golden

The best Yellow **Winter Apple** except Stark Golden Delicious. Propagated from famous Ohio Exp. Sta. Grimes Golden Tree that **averaged 23.9 bu. per year for 14 years.** Stark "Double-Life" Method of Propagating (trade marked by Stark Bro's) eliminates "Collar Rot" fault of ordinary Grimes Golden trees. The fruit is good size—golden transparent yellow color—crisp, tender flesh—rich, spicy and juice laden—with exquisite, fragrant aroma. A great favorite for home and market and sells for high prices. Trees Sold ONLY by Stark Bro's.

"Double-Red" Rome Beauty

Winter — An improved **SOLID RED-ALL-OVER** strain of old Rome Beauty is propagated from specially selected Parent Tree in noted Cox Orchard, Lawrence Co., Ohio. **Obtainable only from Stark Bro's.** The extra beautiful fruit colors deep solid red clear to the stem and calyx. Far better than old Rome Beauty. Tree is young bearer, **late bloomer** (dodges frosts), bears regularly and heavily when others fail. A splendid home orchard apple and by far the best strain of Rome Beauty the commercial orchardist can plant.

Black Ben

Winter. Introduced by us over 30 years ago. Propagated from best known Record-Bearing Parent Tree. Fruit is deep blood-red—no stripes—very attractive. Far better than Gano or any other Ben Davis type apple. Extremely heavy bearer. Apple is perfect keeper both in cellar and storage. Never scalds. If you are planting any apple of Ben Davis type, select Black Ben for greatest profit.

Paragon Winesap

Gilbert Strain

The best of Mammoth Black Twig type of apples. Sometimes called **"The Glorified Winesap."** Deep, solid red apple 50% larger than ordinary Winesap—firm, rich flavored flesh of fine quality. **Late winter keeper,** does not scald in storage. Our propagation is from a Record-Bearing Paragon Tree selected especially because of extra fine color of fruit. Trees are long-lived and bear well. Best Winesap type except Staymared.

For Other Apple Trees Not Described, See PRICE LIST, Pages 11 and 12

Lincoln—King of All Pears

America's Best Pears

All are Stark RECORD BEARING Strains

LINCOLN—King of Pears

Late Summer. Our Genuine ORIGINAL TREE Strain. Best all-around, all-purpose pear for the Middle West and East. Fruit averages larger than Bartlett; clear, beautiful glossy yellow. Good shipper, superb quality—many claim even better than Bartlett. Tree remarkably *hardy and blight resistant*, long lived. Heavy cropper, should be thinned for largest size. Our propagation direct through Original Lincoln tree on grounds of W. E. Jones, Logan Co., Ill. When we first offered Lincoln, we claimed it to be as hardy as an Oak—and experience has borne out this statement. Has borne enormous crops every year, since first coming into bearing. Fruit has always brought best prices. In our orchard has outlived and outborne over 50 varieties and blighted very little while many other varieties have blighted to death. After 30 years' experience with Lincoln we still recommend it as the best. It thrives where many pears fail.

"Lincoln more blight resistant than any other; equals Bartlett in flavor and texture."—J. W. Jones, Emmet Co., Idaho.

"Lincoln did not show a trace of blight. Trees standing within 15 feet blighted to the ground."—W. C. Wilson, Rock Island Co., Illinois.

Anjou *Late Fall.* We propagate Anjou from Special Record-Bearing hardy Missouri tree, producing fruit of superior value and perfect type. Fruit large, handsome yellow, often blushed red and rich flavor. A long keeper—holds up well on market, very showy, commands best prices. Tree upright in growth, good bearer, strong grower, hardy, *young bearer*, blooms late, remarkably *free from blight.* Fall and winter storage markets are always eager for Anjou and pay good money for them.

"Good size, excellent quality. Begins to ripen in October and keeps until midwinter. Tree hardy, bears well."—U. S. Pomologist.

Kieffer *Winter.* The best known, most widely planted *winter* pear of extra large size, rich golden yellow tinted with red, beautiful, when full ripe is fine for canning and baking—fair quality. Tree vigorous, young, regular and heavy bearer—outbears everything in our orchards. East of the Rocky Mountains it is the money-making pear for the millions.

Stark Tyson *Very Early Summer.* This delicious pear has been called "The Summer Seckel"—and this description fits it perfectly. About the size of Seckel and very similar quality—melting, juicy, fine. Our propagation is from a select Record-Bearing strain, larger and better than the old Tyson, and more valuable. Every home orchard should contain at least one Tyson tree.

Stark Seckel (Sugar Pear). *Late Summer.* Improved Record-Bearing strain of Seckel has been grown by us for years and propagation kept pure. Fruit is medium size, spicy honeyed flavor and has been for generations the highest standard of quality. No other pear can take its place. Brings top prices. More should be grown. Tree hardy, thrifty and blight resistant.

Bartlett *Summer.* A World Wide Favorite with delicious quality and superb beauty that has made it the standard on all markets. Large rich golden yellow with red blush; juicy, melting, with rich indescribable flavor that has made it the most popular flavored pear. In the great pear sections of the west, Bartlett, Anjou and Buerre Bosc are largely planted commercially and are shipped by train loads to eastern markets. The tree is a strong grower, but sometimes blights. Bears young, bears large crops regularly. Our propagation is from a Record-Bearing tree in the Stark-Burbank Test grounds which we have watched for years. It is a typical Bartlett that has been more blight resistant than others. Bears enormous crops regularly and fruit has averaged extra large. Bartlett, Stark Seckel and Lincoln are our choice for high quality pears.

Fame (Trade-Mark). *Late Autumn.* A pear of delicious quality, juicy, melting, sweet and rich—no pear more delicious. A fine smooth grained fruit, greenish yellow, slight bronze on exposed side, few seeds and practically no core. A hardy Native American pear, originating in northern Arkansas. Hardy, strong, long-lived tree, young bearer—blight resistant. We introduced Fame many years ago and still recommend it as one of the best varieties for planting throughout America east of the Rocky Mountains.

Duchess (Angouleme). *Fall.* Our Record-Bearing strain is young bearing, often fruiting the second season after planting. The fruit is extremely large (often weigh over a pound each), greenish yellow, spotted with russet with white rich flesh and excellent quality. Probably the most satisfactory home orchard and kitchen pear. The tree is long lived, healthy, hardy, bears extremely young and produces enormous crops. Has been a favorite for generations and is still one of the best. Should be planted in all home orchards.

Beurre Bosc *Fall.* A large, long shaped, beautiful, deep yellow commercial pear that is juicy, extra sweet and of excellent quality. Its peculiar shape makes it very attractive on the fruit stands and it has always shown good profits to the grower.

Stark Seckel Improved—Sugar Pear

Prices of All Varieties Are on Page 12—ORDER BLANK on Page 16

Big Luscious GRAPES

Stark Delicious Grape ½ Size

Stark Delicious Magnificent bright *red* sort. Sweetest, richest, best quality of all red grapes. *Ripens in September.* Berry medium to large size. Bunch large, long, shouldered, compact and goes on market in good shape. Most beautiful, **best quality** large red grape we have ever seen.

Campbell Early A big *black* grape ripening ahead of Concord—slightly ahead of Worden. Averages larger than Moore Early, but is hardly as valuable commercially. Should be in every home vineyard.

Worden Early Glorious *black* grape; as *hardy*, healthy, vigorous and productive as Concord and *larger*, better quality and ten days earlier. Worden is recognized as one of the best commercial varieties grown. Both berry and bunch are large, bunches compact and quality excellent. One of the most popular market sorts.

Concord Best known of all *Black* grapes. Making money for vineyardists everywhere. Healthy, *hardy*, vigorous, large bunch and berry. Will produce more year in and year out than any other sort.

Lucile *Early Red.* A dark red grape, medium to large berry and bunch, excellent quality, keeps well and ships well. In vigor, health, *hardiness*, productiveness surpassed by no other variety and practically immune to fungus diseases. *Very hardy.*

Lutie A rich *red* grape good everywhere and under all conditions; a favorite in New York Grape Belt and succeeds in the South. Seldom rots, always dependable. Bears enormous crops.

Niagara Best known *white* grape. Famed as "Grand Father" of Stark Delicious. Ranks with old reliable Concord in vigor and productiveness. Widely planted. Bunch large; handsome, juicy, and a fine flavor.

Diamond (Moore's Diamond.) A magnificent *white* grape just earlier than Niagara. As dependable in vine and fruiting as Concord. High quality, early, *hardy*, productive. Formerly America's finest Champagne grape.

Hicks A *black* grape, larger and a decided improvement on Concord. A better grower and heavier bearer. Highly recommended by New York Exp. Sta. Introduced by Stark Bro's some years ago.

Stark Eclipse (Trade Mark.) *Earliest black grape.* Sweetest and best in quality. Ripens week or ten days ahead of Moore Early and Campbell Early. Markets take them readily at highest prices. *Hardy*, healthy, strong-growing, good foliage, bears well, hangs well, does not crack in wet weather or shatter fruit from the bunch and a splendid shipper. Originated with Mr. E. A. Riehl, orchardist, vineyardist and Director of the Ill. Exp. Sta. at Alton, Ill. For best results, should be planted with other varieties to secure proper pollenization.

Delaware Medium size bunch and berry, but the standard by which the quality of other grapes is measured. Most widely known red grape and should be planted on all home grounds.

Eclipse ½ Size

STARK ECLIPSE—The earliest ripening black grape. *Photo* 1/2 *size.*

LUTIE—A great and popular red grape. *Photo* 1/2 *size.*

Moore Early 1/3 Size

MOORE EARLY—One of the best black grapes ripening before Concord. *Photo* 1/3 *size.*

Moore Early *Early Black.* Black grape similar to Concord in appearance and quality, but ripens **two weeks earlier** and is the leading standard black grape of its season. Bunch and berry large, quality good. Vine healthy, vigorous, *hardy*, heavy bearer. Succeeds everywhere. Ideal for grape juice.

BLACKBERRY

Blowers *Everbearing.* Very large jet black fruit, extremely sweet. *Hardy*, rugged, good bearer, and fruit ships well.

Early Harvest *Very Early.* Valuable because of early ripening, excellent flavor, good shipper. Medium size, glossy black. Firmer than any other.

Eldorado *Mid-season.* Enormous berries, jet black. Plants strong growing, *hardy*, and rarely fail to bear big crops. Keep well after picking, ship well.

Mersereau *Mid-season.* Beautiful, glossy black. Resembles Snyder, but larger, better quality and less likely to turn red after picked. Fruit large, round, good quality and holds up well. We believe Mersereau the best blackberry.

HICKS—A black grape of great size—of the Concord type.

RASPBERRY

Flaming Giant *Red.* The World's Record Red Raspberry. Stands 15 degrees below zero without injury. Bears twice as much as Cuthbert and Sunbeam. Large size—berries often three-quarters inch across.

Columbian *Mid-season Purple.* Best of purple raspberries, fruit large, firm, good quality. Plant *hardy*, bears big crops.

Cumberland *Early Black.* The most widely planted, black cap, extremely *hardy*, upright vigorous grower, productive, disease resistant. Fruit very large, firm, excellent quality, ships well.

Redpath Latham Mosaic free Strain. *Red, Best,* Largest, New Red. Firm, juicy, sprightly, good quality, ships well. Plant vigorous, upright, *hardy*, bears tremendous crops.

St. Regis Everbearing *Early Red.* A real everbearing raspberry. Produces big, luscious fruit all summer long. Berries bright crimson, rich, delicious, firm for shipping; plant strong grower, upright, vigorous, *hardy.*

Flaming Giant Raspberry 2/3 Size

A Home Orchard Will Feast YOUR Family

Home Orchard of G. B. Mays, Champaign Co., Ill., All Record-Bearing Strain Stark Trees. Last Year He Sold 47 bu. Of Cherries, 54 bu. Of Plums and 90 bu. Of Apples Besides All The Family Ate and Put Up For Winter Use. This Little Orchard-Vineyard Has Netted Him About $700.00 Profit Per Year For Years.

You have enough spare ground in your Home Yard or Farm to set out one of the home orchards offered below of a few trees that will bear all the fruit from early to late each season that your family can eat — plenty to "put up" for the balance of the year — and, **lots more that you can sell on a roadside stand or in nearby towns** — often paying for the trees with the first crop.

As Prof. T. J. Talbert, Missouri State Horticulturist, stated in the **Kansas City Star of March 23, this year, "A Small Orchard Will Prove An Asset To The Farm."**

Prof. Talbert goes on further to say: "Many think that the home orchard will require an undue amount of work. **This is not true for the home orchard of one acre or less.**

"The prospective home orchardist should keep in mind the **MAIN OBJECT OF THE HOME ORCHARD IS TO SUPPLY ENOUGH FRUIT FOR THE FAMILY.** With proper care and attention, no similar area on the farm will produce for the time and labor employed as great returns to the **yearly food supply** of the family as the home orchard."

The "one crop" farming idea has been banished. All wise farmers know that they should raise some hogs, cattle, poultry and that they should plant other crops besides just corn or wheat. The basic idea of **RAISE MOST OF WHAT YOU EAT RIGHT ON YOUR OWN FARM** has again become the motto of shrewd farmers — for both health and economy. No farm is complete without a home orchard.

No. 4 Collection:

"Big Leader" Orchard

$10 — For $14.40 Worth — SAVE $4.40

All Are Leading Varieties.
All Big 4 to 7 ft. Size Trees

- 1 Starking (T-M)

Orders at Prices Quoted in this Price List, except in states of Wash., Ore., Calif., Ida., Utah, Ariz. and N. Mex. where We Pay Freight on $15 and up Orders. We will use our judgment as to best method of shipment. Demonstration Orchard Orders are f. o. b. Nurseries.

TERMS.

All cash with order — except on large orders of 200 trees or more. On orders of 200 trees or more, to parties known to us to be reliable and well-rated, we will accept 10% cash with order, remainder upon arrival. **On Orders of 200 Trees or More Write Our WHOLESALE DEPT. For SPECIAL QUANTITY PRICES. We can meet all Legitimate Competition.**

HOW TO FIGURE PRICES

"Kind" means "family"—apple, or pear, or cherry, or peach, etc.

"Variety" means "name"—Starking, or Lincoln, or Hal-Berta Giant, etc.

See Page 12 for Rates on Grapes and Berries.

EACH RATE: 1 to 10 trees, shrubs, roses, etc., sell at each rate. (*No matter how many different varieties.*)

10 RATE: 10 to 30 of a "kind" sell at 10 Rate. (*No matter how many different varieties*).

100 RATE: 30 to 200 of a "kind" sell at 100 Rate. (*No matter how many different varieties*).

WHOLESALE — For 200 TREES or more write Our Wholesale Dept. for Special Quantity Prices.

WE REPLACE FREE As Follows: Stark Bro's desire is to satisfy every customer — that has been our policy for 117 years. We guarantee Stark Nursery Stock to reach the customer in good condition, and we will refill absolutely free any stock that does not reach customer in good condition, *provided we are notified immediately on arrival of order* so that we can make claim with the railroad or other transportation company. If any stock fails to live as a result of any fault of ours or of our stock, we will refill same, provided customer makes claim for replacement before August 1st following season of orginal planting. However, we cannot be expected to replace stock that dies due to unfavorable seasons, improper care, lack of cultivation or other causes over which we have no control.

MONEY BACK. In the event that any nursery stock sold by Seller Company proves untrue to name as labeled, Seller Company agrees, on satisfactory proof to it of such untrueness to name, to refill that portion of the order so proven to it to be untrue to name, or, at its option, to refund the purchase price paid therefor, and as the Seller Company does not give any warranty, express or implied, in respect to any nursery stock sold by it, the purchaser's or any one else's damages, if any, for any breach of this contract, or any special contract herein contained, by Seller Company, shall be limited to the refilling of that portion of the order, or to the refunding of the purchase price paid therefor, as above stated. Non-delivery of stock is excused in case of fire, frost, floods, drouth, strikes, shortage of nursery stock or other causes beyond seller's control.

GET UP CLUB ORDERS — GET 10% FREE TREES — FREE FREIGHT

GET UP CLUBS among your neighbors and **save money for each one** — Get **FREE TREES** (where total of orders amounts to $10.00 or more); Get **lower rate and Free Freight** for larger quantity, etc. For your trouble **ADD to the Order FREE** of charge **Trees to the amount of 10% of Club Order.** These extra trees should go to the Club Maker, but of course may be divided.

INSPECTION. The Certificate of our State Entomologist is attached to all shipments. No diseased or infested trees are permitted in our nurseries.

PARCEL POST ORDERS. We can ship 3 to 5 ft. size trees or smaller by parcel post. Also grape vines, berry plants and small size Ornamentals.

PLANTING DISTANCES

APPLE—20 to 40 ft. apart.
APRICOT—20 to 24 ft. apart.
CHERRY—(Sour sorts) 18 to 24 ft. apart; (sweet sorts) 20 to 27 ft. apart.
GRAPE—8 ft. apart in rows 10 ft. apart.
PEACH—16 to 20 ft. apart.
PEAR—Standard, 20 to 27 ft. Dwarf, 10 to 16 ft.
PLUM—15 to 20 ft. apart. QUINCE—10 to 16 ft.
BLACK RASPBERRIES OR BLACKBERRIES—3 ft. between plants, in rows 6 to 8 ft. apart.
ASPARAGUS—1 to 2 ft. between plants, in rows 3 to 3½ ft. apart.
MULBERRIES—22 to 28 ft. PECANS—35 to 40 ft.

Plant a Home Orchard of varieties ripening in succession—for fresh fruit continuously from earliest to latest.

* Starred sorts (* or **) are best of type and season.

Our Selection of the Best Flowering Shrubs

BARBERRY, JAPANESE (*Berberis Thunbergi*). A highly desirable semi-dwarf shrub—adapted to a variety of uses. Extremely hardy, compact and graceful plant with small, bright green leaves and short, slender, protecting thorns. Foliage is brilliant orange and red during autumn and the branches are set with showy, bright red berries during winter. Splendid hedge plant that requires very little trimming.

BUTTERFLY BUSH (*Buddleia davidi*). Popular plant, medium size. Dies to ground each winter but will grow 5 feet or more in single season. Blooms from July until frost. Long spikes of fragrant, brilliant lilac flowers, orange centers which attract butterflies. A glorious "Summer Lilac"—with a profusion of colorful flowers to brighten the lawn or border.

CRANBERRY BUSH, AMERICAN (*Viburnum americanum*). Beautiful shrub, far superior to European Cranberry Bush. Large, flat heads of white flowers are followed by big clusters of bright red berries. Bright red and yellow foliage in fall. Quick growing—ideal tall (8 ft.) shrub for screen or border planting. Berries relished by birds. Attractive foliage.

Diervilla Florida
(Weigela Rosea) Photo Below

DEUTZIA, LEMOINE (*Deutzia lemoinei*). One of the best Deutzias. Medium height, and in spring is completely covered with large clusters of white flowers. For shrub border or in foundation planting. A favorite, semi-dwarf shrub with slender branches nodding under an avalanche of flowers.

DEUTZIA, "PRIDE OF ROCHESTER" (*Deutzia scabra*). Tall growing. Double flowers borne in long panicles, and outer petals tinged pink. A charming shrub of vigorous growth for foundation or border planting.

DEUTZIA, SLENDER (*Deutzia gracilis*). Dwarf Deutzia, blooms in May. Small, snow-white flowers entirely cover bush. Unexcelled for low foundation or entrance plantings, or in front of taller shrubs. This dainty little hrub will prove welcome in any planting.

DOGWOOD, CORAL (*Cornus alba siberica*). All-purpose shrub, medium height, stems and branches bright red during winter. Clusters of creamy white flowers are followed by blue-gray berries. Hardy. Pretty winter contrast when planted with White Birch and Evergreens. Height 4 to 5 ft.

ELDER, GOLDEN (*Sambucus canadensis aurea*). Foliage bright golden yellow throughout season. Most effective mass plantings. Fragrant flowers in large attractive clusters. Will liven up dark corners and add colorful interest to an entire shrub planting.

FORSYTHIA, BORDER (*Forsythia intermedia*). Literally covered with bright yellow bell-shaped flowers before leaves appear. Foliage equally fine. Medium height, useful for border, entrance or foundation. "Golden Bell" is unapproached in loveliness among early yellow flowers.

HONEYSUCKLE, RED TATARIAN (*Lonicera tatarica siberica*). Practically first shrubs to leaf out in spring. Unexcelled for tall borders or screen plantings. Often used for tall hedges as they withstand shearing. Most popular Honeysuckle, bears masses of deep pink flowers followed by showy red berries. Rapid growth and dense foliage—indispensable for quick screen.

HONEYSUCKLE, MORROW (*Lonicera morrowi*). Medium height. Flowers, white when first open, later turn yellow, and fragrant. A wonderful shrub for border or screen. Rapid growing.

JETBEAD (*Rhodotypos kerrioides*). Medium height, attractive foliage, white flowers resembling Mock Orange, borne profusely in May and June and fall. Shiny jet-black berries. Splendid for foundation or front of border. Sun or shade.

HYDRANGEA, PEEGEE (*Hydrangea paniculata grandiflora*). Showy medium to tall shrub. Enormous bloom-heads during July and August, at first white and then changing to pink. Unchallenged for size, unsurpassed in beauty—deserving of its popularity.

HYDRANGEA, SNOWHILL (*Hydrangea arborescens grandiflora*). "Everblooming Hydrangea," blooms from June to Frost. Flower-heads often 10 inches across, pure white resembling Snowball. Medium height and especially useful around foundations or in border. Will succeed in shady place and makes a splendid informal hedge.

LILAC, COMMON PURPLE (*Syringa vulgaris*). The old favorite purple Lilac. Very hardy. The exquisite flowers and delightful fragrance impart lasting memories.

LILACS, FRENCH BUDDED (*Syringa vulgaris*). Great improvement over common Lilac. They bloom when very young and colors range from almost a true blue through all shades. Propagated from parent plants brought from France by C. M. Stark, late president of Stark Bro's Nurseries.

Belle de Nancy. Satiny rose flowers borne in large clusters.

Frau Bertha Dammann. Choice single white variety.

Ludwig Spaeth. Flowers deep, reddish purple, long clusters.

Marie Legraye. Fragrant, white flowers.

Mme. Abel Chatenay. Double white variety.

President Grevy. Finest blue Lilac. Enormous heads of blue flowers are borne profusely.

These Lilacs have been selected for their outstanding beauty, size of bloom, fragrance and hardiness.

LILAC, PERSIAN (*Syringa persica*). Medium height, small leaves and graceful, slender stems. Delicately fragrant, lavender flowers are borne in great clusters. Distinguished and colorful—a highly prized early flowering aristocrat.

MOCK ORANGE, SWEET (*Philadelphus coronarius*). A deservingly popular shrub. Large creamy white blooms, of orange blossom fragrance, borne profusely in May and June. A tall, quick growing favorite for screen effect.

MOCKORANGE, VIRGINAL (*Philadelphus virginal*). An exceptionally attractive semi-dwarf shrub whose beauty is attaining wide popularity. The double, pleasantly fragrant, waxy white flowers often measure two inches across. Flower clusters appear in June and are borne over a long period. Magnificent.

PRIVET, REGEL (*Ligustrum ibota regelianum*). All purpose shrub, medium height. Also for hedges. Attractive dark green leaves borne on drooping branches. Creamy white flowers in June followed by dark blue berries. Especially good on North side of house in particularly shaded or damp location.

Pink Weigela
Weigela Rosea

ROSE, RUGOSA (*Rosa rugosa*). Extremely hardy. Almost everblooming with bright, red flowers, often 3 inches across followed by red seed-pods on plant all winter. Dark green crinkly leathery foliage. A Japanese Shrub Rose of unusual merit for foundation, border or hedge.

SNOWBALL, WHITE (*Viburnum opulus sterile*). "Guelder Rose." Tall, literally covered with enormous white flowers. Ideal as a single specimen or beautiful when massed in shrub border. See photo at left. Especially desirable and useful for cut flowers for Decoration Day.

SPIREA, "ANTHONY WATERER" (*Spiraea Anthony Waterer*). Beautiful, desirable, dwarf shrub. Bright crimson flowers borne in clusters, often 3 inches across, from June until frost. A colorful little shrub—ideal for foundation, entrances or low hedge.

PUSSY WILLOW (*Salix discolor*). Tall growing shrub, silver-gray flower-buds, most attractive for cutting. Many artists have painted them. Winter bud bouquets make homes more cheerful.

SPIREA, BILLIARD (*Spiraea billiardi*). Medium height, with long plumes of pink flowers from July until frost. An interesting shrub both in habit of growth and color of flowers. Height 5 ft.

SPIREA, THUNBERG (*Spiraea thunbergi*). Attractive, feathery foliage makes this a most beautiful shrub. A mass of snow-white flowers appear before leaves. Semi-dwarf. Very desirable for foundation or front of border plantings.

SPIREA, VAN HOUTTEI (*Spiraea vanhoutte*). "Bridal Wreath." Graceful branches completely covered in May with showy white flowers. Perfectly hardy. Best all purpose shrub. Grows rapidly. Splendid for immediate effect.

SHRUB-ALTHEA (Hibiscus syriacus). Often called "Rose of Sharon" or "Hibiscus." Flowers profusely from August until frost. The following varieties are best:

Double Purple. Large, double, purplish blue flowers.

Double Red. Flowers dark red. Showy variety. Profuse bloomer.

Double Rose. Enormous, double flowers, bright rose.

Double White. Pure white flowers borne freely.

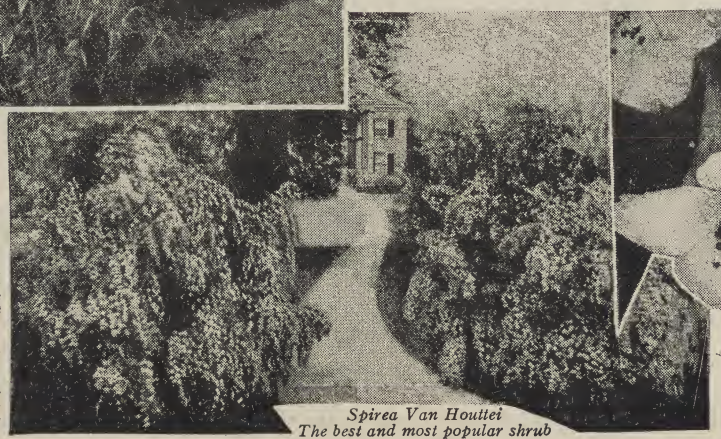
Large, showy flowers in a variety of beautiful colors. Excellent for flowering hedge or border.

Snowball—above

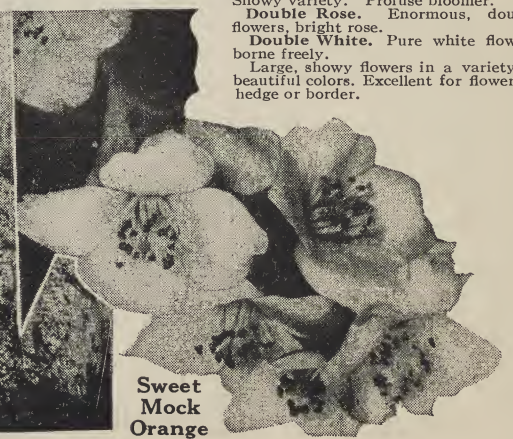
The White or Common Snowball is a glorious sight about Decoration Day

WEIGELA, PINK (*Weigela rosea*). Medium height. Bears profusion rosy pink flowers for several weeks in May and June, and sparingly through summer and fall. The lawn or border is hardly complete without this beautiful shrub.

WEIGELA, RED (*Weigela hybrida, Eva Rathke*). Semi-dwarf, completely covered with dark red flowers during spring. Best red Weigela. A Beauty—almost everblooming—its rapidly increasing popularity is well placed.



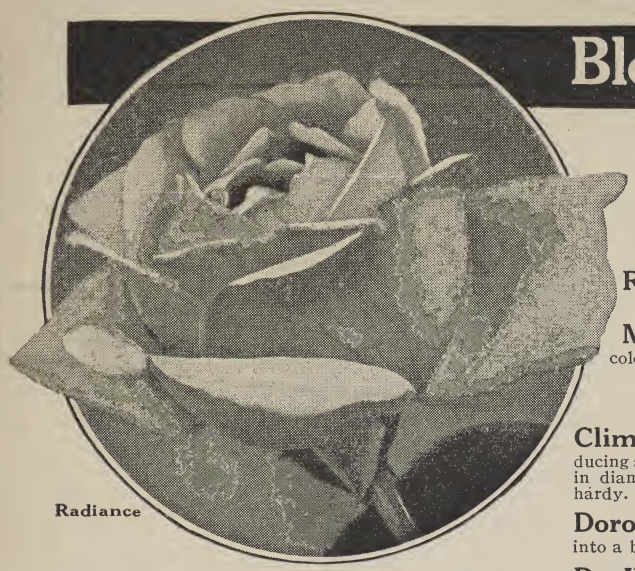
Spirea Van Houttei
The best and most popular shrub



Sweet Mock Orange

For Prices and Complete List of Shrubs See Page 13

Blooming Size STARK ROSES



Radiance

Hardy Perpetual Roses

Paul Neyron Probably the largest Rose. The beautiful bright pink blooms are often 5 to 7 inches in diameter and are borne on long stems, making it excellent for cutting. Often blooms during late summer and fall as well as spring.

Ulrich Brunner The fragrant bright red blooms are borne profusely.

Frau Karl Druschki Also known as "White American Beauty" and "Snow Queen." The pure white blooms are borne on long stems. Blooms throughout summer when properly cared for.

Everblooming Hybrid Tea Roses

Radiance Rightly the most popular pink everblooming Rose in America. Never without blooms from spring until frost. The large fragrant pink flowers are borne on long stems. (See illustration at left.)

Red Radiance Deep red. Believed by many to be even a better bloomer than its parent—Radiance.

Mrs. Charles Bell Sport of Radiance Rose. Delicate salmon-pink color does not fade out. Fine for bedding and cutting.

Sunburst Extremely long orange-yellow buds of delightful fragrance. Free bloomer.

Jonkheer J. L. Mock Extra large blooms on large stems. Petals of silvery pink on inside and deep bright pink on outside.

Kaiserin Auguste Viktoria Most perfect white everblooming Rose. Flowers unusually double and fragrant.

Climbing Roses

Climbing American Beauty An early bloomer producing a profusion of long stemmed flowers often 3 inches in diameter and of American Beauty color. Perfectly hardy.

Dorothy Perkins The clusters of bright rosy pink flowers convert this rose into a bower of beauty in late spring. Unusually hardy.

Dr. W. Van Fleet Voted by majority of the American Rose Society members as the most desirable hardy climbing Rose. The long-stemmed blooms of a lovely apple-blossom color, are as good for cutting as those of any Tea Rose. A midseason bloomer.

Excelsa "Red Dorothy Perkins." Most dependable red Rambler, excelling in every way the old Crimson Rambler. Its flowers are borne in clusters in late spring and last for weeks. Hardy, disease-resistant, and vigorous.

Paul's Scarlet Climber An early bloomer. The large flowers in clusters, are of the brightest scarlet imaginable. Fine for cutting. Flowers do not fade.

Baby Rambler Roses

Baby Ramblers Unexcelled for bedding, edging, or Rose hedges. Bloom continuously from June until frost. The flowers are borne in clusters similar to those of climbing Rambler roses. Baby Rambler Roses rarely grow more than 2 feet in height. We can supply them in Red, Pink or White.

New U. S. PATENTED Roses of Unusual Beauty

Blaze (U. S. Pat. No. 10.) Marvelous new, hardy, **everblooming climber.** Blazing red like Paul's Scarlet. Destined to enormous popularity.

Souvenir (U. S. Pat. No. 25.) A Golden Yellow Talisman. Awarded most Gold Medals of 1932 Roses. Splendid bush rose for garden and cut flowers. Hybrid Tea.

Countess Vandal (Pat. App'l For.) A novel bronze, coral salmon and gold with copper shading. Long pointed bud and exquisite flowers. Five European gold medals. Hybrid Tea.

(Never Before Offered)

Stark Strong-Rooted SHADE TREES

Chinese Elm The new shade tree being planted everywhere. Succeeds everywhere—becoming fine shade size quickly despite dry seasons or poor soils. A tree of real BEAUTY—with lustrous foliage retaining color ALL SEASON. Resistant to drought and extreme cold or heat. Ours are true Hardy North China type.

Birch, Cutleaf Weeping (*Betula alba pendula*). Graceful tree with slender, weeping branches of finely cut foliage. Bark silvery white.

Catalpa, Umbrella (*Catalpa bignonioides nana*). A rapid grower, forms the umbrella-shaped head without pruning.

American or White Elm (*Ulmus americana*). Our grandest shade tree. Famous in American history. Medium rapid grower. Succeeds everywhere. Stark Bro's grow the true vase-shaped type. Graceful, arching branches. Ideal street or lawn tree.

Globe-Headed Locust (*Robinia P. Bessoniana*). New dwarf tree, similar to Umbrella Catalpa only more refined appearance. Dense foliage. No thorns. Very hardy. Grows Globe shaped without pruning.

Mulberry, Weeping (*Morus alba pendula*). A grafted, weeping tree about 6 to 8 feet high that bears edible fruit. Branches weep to the ground.

Tulip Tree (*Liriodendron tulipifera*). Tall, rapid-growing tree of unusual beauty. Odd-shaped leaves and large, tulip-shaped yellow flowers with orange-colored centers.

Plane Tree, European or Sycamore (*Platanus orientalis*). Rapid grower, bark mottled with large blotches of creamy white. Unusually attractive in winter. Withstands smoke, gas, and other similar conditions. Ideal street and lawn tree for city.

Poplar, Carolina (*Populus eugenei*). Most rapid-growing shade tree. Bright, green, glossy foliage. Often planted for quick shade between slower growing trees.

Poplar, Lombardy (*Populus nigra italica*). Tall, picturesque tree of slender, upright growth. Valuable in formal gardens. Hardy, rapid grower. Stately tree for background and sky-line accent.

Willow, Wisconsin Weeping (*Salix Blanda*). Hardy. Unusually rapid grower, with long, slender, drooping branches and narrow green leaves.

Maple, Norway (*Acer platanoides*). Rapid grower, clean, deep green foliage, natural, globe-shaped, compact head. Showy clusters of bright yellow flowers in early spring.

Maple, Silver (*Acer dasycarpum*). Exceptionally rapid grower, long-lived and perfectly hardy.

Maple, Sugar or Hard (*Acer saccharum*). Beautiful, slow-growing, long-lived tree. Gorgeous orange, red and gold foliage in fall.

Norway Maple

American Elm

Hedge Plants

Privet, Amur (*Ligustrum amurense*). Hardy northern type. This variety will withstand severe winters (40 degrees below zero) without injury, and is, undoubtedly, the best Privet.

Privet California (*Ligustrum ovalifolium*). Makes a most excellent hedge where winters are not too severe.

Barberry, Japanese (*Berberis thunbergi*). See description under shrubs, page 14.

*Date*_____ **STARK BRO'S NURSERIES, Louisiana, Mo.**

Subject to terms and conditions of your current Price List and the following Agreement, ship Nursery Stock as listed, for which I enclose $_____

The following agreement, between the undersigned and Stark Brothers Nurseries and Orchards Company, of Louisiana, Missouri, refers to the purchase by the undersigned of STARKING (Trade-Mark) (Stark Bro's Double-Red Delicious) apple trees and (or) GOLDEN DELICIOUS (Trade-Mark) apple trees and (or) STAYMARED (Trade-Mark) apple trees and (or) HAL-BERTA GIANT (Trade-Mark) peach trees and (or) any of the LUTHER BURBANK NEW TREE OR PLANT VARIETIES. Owing to the great expense of the wide-spread testing and investigation of these valuable trees and plants, and the great cost of their introduction, Stark Brothers Nurseries and Orchards Company is protecting itself as well as the public from the imposition and substitution often practiced by unscrupulous dealers. This is intended to prevent fakers from misbranding and marketing inferior fruits as genuine. Furthermore, this will enable growers who purchase Genuine Stark Trees or plants of the above named varieties to reap the reward of the high price on the markets for the fruit of these high quality trees and plants without having the damaging influence of bogus and inferior sorts which may be attempted to be marketed as genuine. Thus the reputation for long keeping, high quality and big profits of these fruits will be maintained and protected by the cooperation of Stark Brothers Nurseries and Orchards Company and the purchasers of any of the above named varieties. Therefore, in consideration of the agreement of the undersigned not to give away or sell or permit anyone else to give away or sell or to take these STARKING (Trade-Mark) apple trees and (or) GOLDEN DELICIOUS (Trade-Mark) apple trees and (or) STAYMARED (Trade-Mark) apple trees and (or) HAL-BERTA GIANT (Trade-Mark) peach trees and (or) any of the LUTHER BURBANK NEW TREE OR PLANT VARIETIES or their progeny or scions, buds or cuttings from these trees herein mentioned or their progeny or any other STARKING (Trade-Mark) apple tree and (or) GOLDEN DELICIOUS (Trade-Mark) apple trees and (or) STAYMARED (Trade-Mark) apple trees and (or) HAL-BERTA GIANT (Trade-Mark) peach trees and (or) any of the LUTHER BURBANK NEW TREE OR PLANT VARIETIES or their progeny that may be furnished to the undersigned in the future by Stark Brothers Nurseries and Orchards Company for a period of twenty-five (25) years after any such trees and (or) plants are so furnished and the further consideration of the sale of any of the foregoing trees and (or) plants named in this purchase agreement, Stark Brothers Nurseries and Orchards Company, agrees to furnish the varieties named in this purchase agreement, which are herein ordered, to the undersigned. The undersigned agrees that in case of disposition of the property on which any of the varieties, named in this purchase agreement, are planted to make this agreement a condition of the transfer. In the event that any nursery stock sold by Seller Company proves untrue to name as labeled, Seller Company agrees, on satisfactory proof to it of such untrueness to name, to refill that portion of the order so proven to it to be untrue to name, or, at its option, to refund the purchase price paid therefor, and as the Seller Company does not give any warranty, express or implied, in respect to any nursery stock sold by it, the purchaser's, or any one else's damages, if any, for any breach of this contract, or any special contract herein contained, by Seller Company, shall be limited to the refilling of that portion of the order, or to the refunding of the purchase price paid therefor, as above stated. I have read, understand and hereby agree to all these agreements and terms of sale.

U. S. Patented Hal-Berta Giant—30% Larger Than J. H. Hale—Bears Heavy as Elberta

HAL-BERTA GIANT—World's First Patented Peach

Trade-Mark

Original Tree at 4 Yrs. Bore 6 Bu. of Peaches—Many Weighing a Pound Each!

Hal-Berta Giant—the amazing **NEW** Mid-Season Freestone Yellow Peach which fills the long-felt need for a **SUPREMELY HIGH QUALITY, EXTRA LARGE** yellow freestone peach to lengthen the Hale-Elberta season. A beautiful peach—almost fuzzless skin—small pit—firm, luscious, honey-sweet flesh and juice.

Hal-Berta Giant Trees Sold ONLY by Stark

Our experts reported: "This peach is so marvelous that one must see this tree to get a real idea of how **beautiful** and **BIG** peaches can be. Not a single small peach on entire tree. These peaches have developed huge size with very little moisture. If moisture had been normal, they would have been **STILL BIGGER!"**

This wonderfully **BIG** peach has all the delicious flavor and melting tender flesh of J. H. Hale (though **ACTUALLY** 30 Per Cent **LARGER** than Hale)—bears bumper crops like Elberta.

Eye-witnesses of the behavior of the original Hal-Berta Giant Tree declare: **"This 4-year-old tree bore 6 bushels—and half of these peaches WEIGHED NEARLY A POUND EACH! The tree began bearing when 2 years old."**

This proved to be **the Yellow Peach for Which We Had Been Searching for 15 Years!—A Yellow Freestone Peach to Follow J. H. Hale and Elberta**—and lengthen the high-profit-season for growers.

Hal-Berta Giant Peach Trees (Sold **ONLY** By Stark) are remarkably **VIGOROUS** and **HARDY.** Young Hal-Berta Giant Trees came through **26 degrees below zero** two winters ago—in fine shape where many Elberta and Hale trees were winter killed.

Hal-Berta Giant average size on left compared to Elberta grown in the same orchard on the right.

This huge peach originated in the famous Markham Peach Orchard in Clay Co., Ill. We sent experts to investigate this remarkable peach and the Original Hal-Berta Giant tree—and BOUGHT THE ORIGINAL HAL-BERTA GIANT TREE, PAYING THE HIGHEST PRICE EVER PAID FOR A PEACH TREE!

STARK EARLY ELBERTA—Best of ALL Elbertas

Introduced by Stark Bro's—**OBTAINABLE ONLY FROM STARK BRO'S**—and acknowledged today as **THE FINEST OF ALL ELBERTAS.** The fruit is SUPREME IN SIZE, BEAUTY AND FLAVOR—superb golden yellow, blending into rich red on the sunny side—luscious flesh full of nectar-sweet juice. Allures with its beauty, gratifies with its unexcelled quality and **sells at top-market prices all over the land.** Much **LARGER THAN OLD ELBERTA**—decidedly better quality—not nearly so fuzzy—has smaller seed—with none of old Elberta's coarseness, stringiness or bitterness. Colors **ALL OVER** before it softens, making it ideal for distant shipments. Actually has been shipped 11,509 miles (two and three-quarters times across the U. S.) **without an ounce of ice—and arrived in fine shape, "crisp and juicy to the last."**

Stark Early Elberta was selected by us as the **BEST ELBERTA** of its season **ONLY** after 30 years of exacting tests of nearly 4,000,000 different varieties and strains of Elberta.

Much Hardier Than Old Elberta

Early Elberta has a very hardy North China type bloom. "Late frosts very severe here, but, my **Stark Early Elberta peach trees bore a full crop—surest bearer ever grown,"** reports Dr. E. L. Morris, Fayette Co., **TENN.** This is easily the best strain of Elberta Peach for every home orchardist to grow—and the most profitable for the commercial orchardist.

J. H. Hale—Mid-Season Yellow Freestone

Originated by Mr. J. H. Hale, "The Peach King." Far surpasses old Elberta in size, color, texture, flavor and shipping ability. Mammoth size, vivid carmine over golden yellow—almost perfectly round—fuzzless, smooth as a glove. Flesh solid like a cling, yet melting, tender, exquisite flavor—free from grain and stringiness.

Tree stocky grower, often bears at 2 years. Bears heavily and suited to wide range of soils and climates. Has proven its **HARDINESS** all across America. "J. H. Hale here **BORE after 22 degrees below zero** and came through without injury, while Elberta froze out. Very large fruit. Very vigorous, rapid growing tree. Will replace Elberta in future plantings. Both as a home orchard peach and as a commercial orchard profit maker!" declares N. P. Mead, Chelan Co., Wash.

Southern Farming reports: **"From 1 acre J. H. Hale trees,** we harvested **748 bushels—**1,500 baskets and 1,000 six-basket crates. They sold the next morning for **60 per cent higher than** Elberta. **THAT MEANT A $1,420.00 PER ACRE CROP."**

6 Best Golden-Fleshed Peaches—From Early to Late For Market and Home Use

YELLOW FLESH PEACHES—Prices Page 10-11

June Elberta *Earliest-of-all Yellow Peaches.*—For years peach growers have been asking for a large YELLOW FLESHED PEACH THAT RIPENS EXTREMELY EARLY. We have searched America for a peach of this class, have tested many, but not until we fruited JUNE ELBERTA, did we find one that we could wholeheartedly recommend. Ripens about with Red Bird Cling. These two peaches make a great money-making combination. Both ripen about **40 to 45 days before Elberta**—and a man who has an orchard of them can put on the market the BEST EARLY WHITE-FLESHED AND THE BEST EARLY YELLOW-FLESHED PEACH GROWN.

A semi-freestone; big handsome peach, high color, delicious quality, ships well. Trees are vigorous, young and heavy bearers and blossoms very hardy—**brings highest prices.**

"My June Elberta sold for $3.50 per bushel here while inferior kinds brought about half this price."—J. S. Smith, Cabell County, W. Virginia.

"On the grounds of Geneva, N. Y. Exp. Sta., June Elberta is wonderfully attractive. Fruit large, handsome yellow, red blush on sunny side—one of **handsomest of peaches.** Quality good and equal to or an improvement on Elberta."—Prof. U. P. Hedrick (N. Y. Exp. Station).

"June Elberta about a month earlier than Elberta. Fruit large and attractive."—Stanley Johnson, Supt., South Haven, Mich., Exp. Sta.

Stark Early Elberta *Early Yellow Freestone.* Introduced by Stark Bro's. Easily finest of all Elberta types. Turn to Page 17 for description and record.

Golden Elberta Cling *Mid-season Yellow.* Greatest, most delicious, yellow-fleshed clingstone peach ever introduced. Heavy Bearer. *"World's Finest Canning Peach."*

J. H. Hale *Mid-season Yellow Freestone.* The wonderful yellow freestone that ripens 3 or 4 days ahead of Elberta. Turn to Page 17 for description and record of J. H. Hale.

Late Elberta *Late Yellow Freestone.* (Stark Rex Strain) Elberta type ripening about **21 to 28 days later** than old Elberta. Better quality than Elberta, somewhat larger. Fills gap between Hal-Berta and Krummel October. Highly flavored, sweet, no bitterness at pit. Ships perfectly, does not rot, good appearance on markets. Many growers report it one of their surest late market profit-makers. By planting this with Hal-Berta the ripening season can be lengthened four weeks.

Krummel October *Latest Yellow Freestone.* Greatest of all late yellow peaches. The peach that ripens after all other good peaches are gone—reaches market at the time when it has no competition. Always *brings highest prices.*

Large—almost as round as J. H. Hale, deep yellow with blush of carmine. No peach is sweeter or better—no bitterness next to pit. Flesh firm, fine texture—ships perfectly. Canning quality the best. (Introduced by Stark Bro's.) Ripens about **40 days after Elberta.**

"Krummel October is perhaps the best late yellow freestone. Thrives in all localities where peaches are grown—a little later than Salway and a better peach. Tree hardy, dependable cropper. Krummel should be in every family orchard."—Missouri State Exp. Sta. "The best paying peach I know."—N. Waterhout, St. Louis Co., Mo.

Stark's "Silver Medal" Peach Collection No. 8

6 Best White-Fleshed Peaches—From Early to Late For Market and Home Use

WHITE FLESH PEACHES—Prices Page 10-11

Red Bird Cling

Earliest Red-White Cling **"The Greatest Money-Maker, Earliest, the Largest and Best of all commercial peaches ripening before Stark Early Elberta".** Size immense, averaging almost large as J. H. Hale—perfectly round, **"Red as fire",** ships better than Elberta—and from the time we introduced it, has **topped all early markets.** Brings double price of Elberta and other standard varieties.

If you want a very early peach, there is really ONLY ONE, for Red Bird Cling stands alone as the best. Ready to ship when the markets are bare of good peaches—bringing as high as **$4 to $6 per bushel.** Ripens **45 days ahead of Elberta.**

"57 Red Bird Peach trees netted me $669, covering about ½ acre of land."—J. E. Eggers, St. Louis Co., Mo.

Eureka

Early White Semi-Free. We introduced Eureka because of its **iron-clad hardiness,** size, beauty and ripening season—about 10 days after Red Bird Cling, **30 to 35 days ahead of Elberta.** Bears when other so-called hardy sorts are killed. Beautiful rosy cheeked peach, white flesh, delightful flavor. Semi-freestone. We recommend it where a succession of ripening is desired.

Alton

Early White Semi-Free. After 25 years' experience we recommend this as ideal peach of Champion-Belle of Georgia-Hiley type. Not all years a true freestone—some seasons being semi-freestone. Ripens **25 to 30 days ahead of Elberta**—about 15 days after Red Bird Cling. Tree and blossoms among the hardiest, one of the surest bearers known. Fruit large, flesh white, sweet, delicious.

Stark Summer Heath

Mid-season White Cling. Creamy-white fleshed peach of the Heath type. Ripens mid-season. Flesh snow white clear to pit, fruit medium large, very handsome appearance. Has lusciousness of late season Heaths. **A wonderful peach for canning,** requires little sugar. Tree hardy, good bearer, and ripens about **7 days after Elberta.**

Illinois

(Trade-Mark). *Mid-season White Free.* Handsome, **fiery-red** cheeked peach, pure white flesh, perfect freestone. Juicy, spicy, high flavored. Compares with Champion in quality. Holds up remarkably well in shipping. Ripens **just before Elberta.** Comes in when a good quality Red Cheeked white fleshed peach is wanted. Red Bird Cling, Alton and Illinois are the three ranking white-flesh peaches of their seasons, and are recommended for all sections.

Stark Heath Cling

Late White Cling. An Extra Large, selected, tested, Record-Bearing strain of White Heath, **40 days after Elberta.** Best Heath Cling type. Mich. Exper. Station states: "100% more productive than old Heath." Most delicious quality, flesh tender, melting, juicy, flavor incomparably luscious.

Luther Burbank's *NEW* Fruit Creations—

No. 21—Burbank's JULY GOLD Peach

No. 22—Burbank's BLOOD-FLESH Nectarine

Above No. 23 Burbank's FLAMING GOLD Nectarine

No. 25 (at left) Burbank's JULY ELBERTA Peach

No. 24 BLACK GIANT Cherry

JULY ELBERTA Peach

Burbank's Very Early New Yellow Freestone

July Elberta Was GRANTED A U. S. PATENT—In this wonderful fruit, Burbank created the **Long Looked-For VERY Early Yellow TRUE FREESTONE Peach**—ripening about twenty-four days before Elberta—and between June Elberta and Stark Early Elberta.

The fruit is beautiful, big, vivid all-over-red peach that makes its trees appear aflame with fire—most brilliant red of all peaches except perhaps Red Bird Cling.

Flesh is pure **golden yellow,** rich in flavor, tender and juicy in texture. Far better quality than old Elberta. Superb for eating fresh or canning.

Burbank's July Elberta trees have demonstrated in our years of tests that they are **the most prolific bearers in our Burbank-Stark Test Orchards**—always bearing heavy crops of very uniform, extra large peaches **ripening just at the time that really fine peaches bring** highest market prices. The crop is well distributed over the tree—a characteristic which is very desirable in a peach for either the commercial or home orchard.

VERY HARDY—bore splendid crops even after 14 degrees below zero in Northern Missouri.

Black Giant Cherry

Sweet. Luther Burbank described Black Giant as "Firm, deep blackish crimson skin. Sugary sweet and delicious. Gigantic in size—**4 cherries weigh an ounce!**"

Our years of tests have proven it an **enormous bearer,** but fruit is uniformly huge despite tremendous crops! Flesh mouth-watering blood red, almost purple around small pit—very firm and meaty—marvelous shipper. Shipped clear across U. S., **reached destination without a bad cherry in the box.**

Amazingly **HARDY** tree—bore after 14 degrees below zero in our Test Orchards in Northern Missouri. The **HUGE** size, wonderful beauty and enticing flavor of "Black Giant" Sugar Cherry makes it **first** favorite in Home Orchards. Its striking appearance, supreme quality, **record-breaking shipping ability** and its great crops of gigantic cherries are the reasons why far-sighted commercial growers are planting Black Giant for the high class, high price markets.

Late Honey-Heart Cherry

U. S. PATENTED—"Beautiful, like Napoleon cherry—but infinitely better," declared Luther Burbank. Our years of tests prove it **the youngest, heaviest producing, big, sweet cherry Luther Burbank ever created.**

Skin is Red and Gold, becoming deep, rich, glowing red when fully ripe. Huge, heart shaped cherry—crisp, juice-laden, marvelously delicious flesh of transparent white (resembling color of White Clover honey). **Perfect freestone.** Wonderful shipper—arrived in splendid condition after 2,000 miles in hot weather. Almost completely immune from brown rot and cracking. Tree strong grower, hardy, young bearer. Ripens here in Mo. about June 20.

GIANT Freestone Peach

A marvelous peach for your home orchard. Tremendous size—**many 4 inches in diameter**—a **BIG** Golden Peach with a thick, luscious, pure golden flesh brimming over with sugar-sweet juice, free from the slightest sharp acidity. A genuine TREAT to eat out of hand and simply glorious when served sliced and smothered with cream. HARDY—bore after very severe winter.

Peacharine

Combination of yellow Peach and white Nectarine—by Burbank. Big, blush-less, cameo-yellow freestone fruit—nearly **fuzzless.** Flesh firm, saturated with sugary juice. Tree vigorous—bore heavily in Missouri 2nd year. Ripens late August here.

Early Honey-Heart Cherry

Beautiful Red and Gold Sweet. Except for early ripening, very like Late Honey Heart. Fine for home markets. Tree very young, heavy bearer.

Rainbow Stripe Cherry

A remarkable novelty in cherries—originated on a dark red Lambert Cherry Tree with one limb bearing WHITE Lambert Cherries with a narrow **Blood Red Stripe** from stem to tip—a true budsport. Fruit huge, delightful flavor, ripens mid-season. Tree hardy, bears abundant crops uniformly large cherries shaped exactly like Lambert. Fine cherry for your home or commercial orchard. Great shipping cherry. Remy Strain.

JULY GOLD Peach

The triumph of Burbank's ambition to create a yellow Freestone peach that would **ripen very early in summer. Ripens two weeks ahead of regular Elberta.** A **BIG** clear yellow-orange peach—2½ to 3 in. across. Rich golden flesh blessed with entrancing flavor. Very young, heavy bearer—**HARDY** vigorous grower. Wonderful early peach for home.

Blood Flesh Nectarine

ONLY INDIAN BLOOD NECTARINE EVER DEVELOPED! Rich color of Indian Blood Peach—skin plum-smooth—blood red tender flesh marbled red and white near pit—wine-like flavor.

"Flaming Gold" Nectarine

The famous "Lost Nectarine" of Luther Burbank. The Wizard has here created a perfect blending of White Nectarine and a delicious yellow peach. Burbank declared: "The very best of my Nectarines." Big as a Champion peach. **Waxy, Fuzz-free skin** of flaming wine-red, blushed over vivid gold. Rich golden orange flesh of Honey sweetness and Champagne sprightliness. Stone is perfectly free and small. Flesh firm. Splendid shipper—**Does not crack.** A luxury fruit for the home—one that assures great profits to commercial orchardists. Ripens about **1 week before Elberta** peaches. **Almost unbelievable young bearing ability: Young 1-yr. trees in our nursery, after the hardest, longest winter in 20 years** (often 14 degrees below zero) **came through loaded with blossoms and set a tremendous crop.** Will bear young, immense crops in Eastern and Mid-Western sections. Very resistant to disease, rot, etc.

Prices on Page 11—All New Burbank Varieties Sold ONLY by Stark Bro's

-U. S. Patented—Sold ONLY by STARK

ELEPHANT HEART, Largest Known Plum—one that you can break and eat like a Peach

Elephant Heart—Luther Burbank's Greatest PLUM Masterpiece

Imagine a plum 2½ x 2¼ in.—big as a U. S. Standard apple—a huge, heart-shaped beauty! A **perfect freestone plum** that you can break and eat like a peach! Blood-red flesh as exquisitely luscious as an Oxheart Cherry. **The most marvelous freestone blood-fleshed plum that the world has ever known.** The greatest triumph of all Burbank's painstaking life work. The supreme **BEST** of over 800 new varieties that Burbank bequeathed to Stark Bro's.

ASTONISHINGLY HARDY! In Mo. and Ill., where 15, 20 and even 25 degrees below zero often occur, Elephant Heart Trees have proven their rugged hardiness, made vigorous growth and **borne very young and heavily**—and, despite heavy bearing, the fruit is uniformly huge and attractive heart-shape all over the tree.

Fruit is remarkable shipper. Strong, firm skin—does not crack. Solid flesh. Can be picked 2 weeks before ripe and shipped successfully to far-distant points. **Has kept perfectly in warm room 42 days after picking and shipping 2,647 miles without refrigeration.**

BEARS YOUNG! Bore at 2 years in orchard of **J. H. Bolton, Schuyler Co., N. Y.** We cannot recommend Elephant Heart too highly for home orchards.

Flaming Delicious

U. S. Patented

BLOOD FLESHED. The great Early Ripening Team Mate of Elephant Heart. **Ripens 2 weeks before Elephant Heart.**

Very rugged and **HARDY**—came through 24½ below zero without injury. Fruit is of great size—often 2½ x 2¼ in.—color waxy, shining red and **FLESH IS GLORIOUS BLOOD-RED CLEAR TO PIT.** Flavor is sweet, rich, juicy. A Perfect **FREESTONE**—so firm that it ships perfectly—small seed. A plum that you will be proud to raise in your home orchard, for, of it, Mr. Stark said, on first beholding it in all its glory, "This **ONE** huge, early plum is alone worth more to fruit lovers than all the years and money spent on the Burbank Experimental Gardens! The tree is a late bloomer—and will escape frosts that kill many other varieties.

Red Ace Plum

Delicious Crimson—Flesh. **Mid-Season Freestone** Plum, nearly as large as Elephant Heart, but rounder. Many 2¼ in. across despite extra heavy bearing. Of Red Ace, Luther Burbank wrote: "**BIG,** crimson flesh—firm—small seed—**sweet as sugar**—rich and full of delicious juice—annual and heavy bearer."

Tree **NEVER** winter killed in our years of exacting tests—even after 24½ degrees below zero. A **WONDERFUL SHIPPER**—and home orchardists will like it because it hangs tightly to tree with no sign of rot for 3 weeks after ripening. Young 3-yr.-old trees in North Mo. loaded with huge plums.

Purple Flame

Brilliant Purple Leaf Foliage Tree bearing rich red plums. Holds its beautiful purple leaves until late Fall. Very ornamental and fruitful.

Great Yellow

U. S. Patent to Stark Bro's

Earliest Yellow Freestone—Ripens even earlier than Shiro and much larger. Fruit is very large (2 to 2½ in. across), of pure golden yellow color (no red cheek) overspread with beautiful white bloom that makes it look almost like Alabaster. Our Test Orchard Superintendent declares it "the largest solid golden plum of all Burbank's. **"Large as an apple."** Tastes exquisitely mild and sweet, with just the right flavor. Tree is a fine grower, good foliage, graceful up-right shape. Bore after 14 degrees below zero here in Missouri. Great shipping plum. Plum Experts who have carefully tested and studied all leading varieties, declare: **"Great Yellow and Honey Moon are unquestionably the two Greatest Yellow Plums in existence!"** Plant Great Yellow in your home orchard to have a great fruit delight for your family—and a high priced fruit for local markets.

Mammoth Cardinal

U. S. PATENTED. *Early*—Huge, cherry red-skin, gold-flesh plum. Some measure 2¾ in. across. Very thick, rich, semi-transparent, creamy yellow flesh—firm, fine grained, solid. Sweet, delicate flavor—completely free from sharp acidity. World famous plum expert declares: "Remarkably early for such an **immense** plum. Very fine color—meaty orange flesh and brilliant red skin." Has borne fine crops despite frosts and drouths in Middlewest. Tree hardy and prolific.

Honey-Moon Plum

Mid-Season Yellow—A luscious Green Gage hybrid Burbank produced. A GREAT GLORIOUS GOLDEN YELLOW PLUM with the sweet, tempting quality of the Gage. Fruit large, almost transparent golden yellow. In it Burbank combined the delicious flavor of the Gage with heavy bearing of Japanese Hybrids. Tree strong grower, produces **tremendous crops** annually. Hardy.

Golden Heart Plum

Early Yellow—A golden, heart-shaped plum with tender, flavor-ful golden flesh—juicy—sweet. Bears extremely young and heavily.

Orange Plumcot

Half Plum—Half Apricot. A Burbank cross of Japanese Plum with Persian Apricot. Rich orange flesh, thick, meaty. Flavor combines plum sprightliness with apricot pungent sweetness. Trees heavy, young bearers.

June Red Skin

U. S. Patent

Earliest Red Skinned Yellow Fleshed Plum. Immense, extremely beautiful, perfectly round red-skinned **FREESTONE** plum with firm golden yellow flesh. Ripens a few days after **JUNE BLOOD** (Red Flesh) and **GREAT YELLOW.** Delightful flavor—sweet and juicy. Tree is very heavy bearer and remarkably **HARDY**—having withstood 24 degrees below zero here in Northern Missouri. A superb early plum for the home orchard—and a money maker on markets.

June Blood Plum

The **Earliest Big Blood Plum** among all of Burbank's marvelous Fruit Creations. Of it, Burbank wrote: "A rich, delicious, deep purple plum. Sweet, juicy, rich. **Largest of all plums ripening at this season."** Flesh amber, rosy-crimson (sometimes beautifully variegated). **Semi-Cling.** Small seed. Great and regular bearer. Has made wonderful record for heavy bearing and **Hardiness** in our far-famed Burbank Test Orchards. Excellent for home orchards for high priced fruit for roadside markets.

Purple Plumcot

Half Plum and Half Apricot. *Early*—Burbank was first man in world to combine the flavor delights of **BOTH** Plum and Apricot in one **NEW** fruit—the Plumcot. This **PURPLE PLUMCOT** is his finest Blood-Fleshed variety—huge, often 2 in. across. Gorgeous purplish red, with flesh blood red clear to pit. Very rich—irresistibly **DELICIOUS.** Perfect **freestone.** Is bearing splendidly in orchards east as well as west of the Rocky Mountains.

Great Yellow—Earliest, Largest Yellow Freestone Plum

America's Best Plums

See Pages 20 and 21 for BURBANK'S NEW PLUMS

All are Stark RECORD-BEARING Strains

Early Gold (Shiro). *Very Early.* See natural Illustration above. Marvelously beautiful transparent golden yellow plum, extra large size, handsome as a plum can be—sweet and delicious. Tree hardy, bears regularly. Succeeds even in north but one of the greatest plums for south—Texas, Arkansas, Mississippi, Alabama, Louisiana, Tennessee, Kentucky, Virginia and all south grows it to perfection.

Omaha *Mid-season.* See Natural Color Illustration Above. The finest "Iron-clad hardy" red plum, wonderful hardiness and thriftiness of tree, size, quality and beauty of fruit. Omaha originated in Nebraska and introduced by us. Our propagation is from the best tree propagated direct from original tree. Large, dark red plum with small pit, meaty yellow flesh, sweet and delicious. The plum for the far north and everywhere. In our own orchards, Omaha, Gold and America and the New Burbank Creations rank at top. "Winter worst for 13 years. Omaha came through smiling 100% alive."—F. J. Colby New Hampshire.

Santa Rosa *Early.* Another Luther Burbank production that won the Gold Medal at the Lewis and Clark Exposition. One of the largest, most beautiful, most luscious of all cling plums. Glorious dark crimson color, immense size, almost round, strong skin, holds up and ships perfectly. We propagate from a tree with a great bearing record.

Shropshire Damson *Late.* Widely known and largely planted. Trees are good croppers but the fruit is some smaller than Stark Damson. Our propagation is from a heavy RECORD BEARING tree. Trees bear enormous crops.

Gold (Trade-Mark). *Our $3,000—Mid-season plum.* Originated by Luther Burbank and introduced by us many years ago and it has made more friends among plum growers than any other plum ever introduced. Fruit is very large, clear semi-transparent golden yellow, later overspread with bright carmine blush. When fully ripe, a light transparent cherry red. Healthy and hardy tree succeeds wonderfully in chicken yards and on moderately dry, thin clay soils. We propagate from a heavy Record-Bearing strain. You can obtain Genuine Gold Plum trees ONLY from Stark Bro's. (See natural color illustration below.)

America *Early.* Another Burbank introduction—a cross between Burbank (Japanese) and Robinson (Native). Large glossy, coral red, a beautiful and delicious plum. It is a variety that can always be depended on for a crop, tree large, thoroughly hardy, bears young and every year.

Indian Blood (Duarte). *Mid-season.* Large, egg shaped clingstone plum, blood red flesh. Delicious quality. Tree upright, hardy. We propagate from Record-Bearing tree of finest type. Recommended especially for home orchards.

German Prune *Mid-season.* We have tested all the known varieties of prunes and selected this as best, except New Burbank Prunes. Large dark blue, juicy, delicious. Largely grown in all prune growing communities.

Late Goose *Late.* Good hardy native plum. Originated by Theo. Williams, Nebraska. We introduced it years ago. Resembles Wild Goose but much larger, more valuable, ripens later. Tree strong grower, extremely hardy, bears heavily. Best planted in the far north. Our propagation from a Record-Bearing Strain propagated direct from Original.

Stark Damson (Big Mackey). *Late.* Largest and best Damson. Originated in Pike County, Missouri. Our propagation is from second generation tree with tremendous crop record of extra size fruit. Damsons are easy to grow, produce immense crops, are money makers. Fine for jams, preserves and jellies.

Stark Green Gage *Mid-season.* Highest standard of quality. Originated by us. Our propagation from a Record-Bearing tree on our grounds. Best of all the Gages. Fruit large, juicy, greenish yellow, exquisite quality. Tree strong grower, bears immense crops. All plum lovers commend it.

Van Deman Quince (*Trade Mark*) Superb flavor, immense size, big producer—Hardy.

GOLD—Our $3000 Trade Mark Plum

PRICES of All Varieties Are on Page 12—ORDER BLANK on Page 16

Stark Black Tartarian Improved Cherry

Sold ONLY by Stark Bro's
A *Hardy* Sweet Cherry

HERE is the hardiest, most dependable, most widely-successful of the LARGE BLACK TARTARIAN SWEET CHERRIES—the ideal **Hardy, Black Teammate of Stark Gold.** In our propagation **we use the Deacon-Mezel Strains which proved the best.** Sweet, early, hardy. Where hardiness or pollenation is required, it is being planted almost to the exclusion of all other black sweet cherries.

Stark Black Tartarian Improved is an extra large, black, heart-shaped, purplish-red fleshed cherry, valuable for home and market.

This RECORD-BEARING Strain of Black Tartarian Improved came from the famous cherry orchards of Edward Hughes, California Cherry Expert, and our trees have been propagated DIRECT from his superior Record-Bearing Parent Tree.

Mr. Hughes says: "This strain is at least 100% better in bearing big crops regularly than any other Black Tartarian I ever saw. The uniform huge size of its fruit is better than any other. A good pollenizer for Bing, Lambert and Royal Anne (Napoleon). Hardy—bore last year when a succession of heavy frosts took most of our fruit and adjoining blocks of other strains of Black Tartarians proved a total loss!" Illustrated to left.

Bing (*Early Sweet*). One of the most delicious dark Red cherries. Succeeds in Central States and East better than most sweets. Tree hardy, foliage heavy, productive. Should be planted with Stark Lambert, which ripens later. Both are great favorites in great commercial sweet cherry orchards.

Dyehouse (*Earliest of All*). Better than Early Richmond, a week earlier, larger, smaller seed—**best very early cherry.** Grown largely all over U. S. Tree thrifty, unusually strong grower, good bearer. For tart cherries, Dyehouse, Montmorency Stark and Suda Hardy are the best. Illustrated above.

Montmorency King (Ordinaire). *Mid-Season.* Cannot be too highly recommended for quality and quantity of fruit, **hardiness** and beauty of tree, and unfailing crops. Ripens a week or ten days after Early Richmond. Montmorency is the most widely planted of all tart cherries, but there is not one-half enough grown to supply the demand. The trees do not require much care, and produce immense crops. Montmorency Stark and Montmorency King are ideal for the market orchard, the home orchard and the small yard. "Montmorency King has had two crops. It is very hardy. Many other sorts winter-killed."—R. J. Wiggins, Quebec, Canada. Illustrated above.

Montmorency Sweet *Mid-Season.* A true Montmorency—not a sweet cherry—but less acid than any other Montmorency. Originated on our own grounds, where we watched it for many years before introducing it.

Montmorency Monarch *Mid-Season.* This is an excellent strain of Montmorency that we secured from the Iowa Experiment Station years ago and because of its extra heavy bearing qualities we have continued to grow it and recommend it—though for commercial orchards we consider Montmorency Stark superior.

Suda Hardy *Late.* Wherever a latered tart cherry is wanted, Suda Hardy should always be planted. **Perfectly hardy** and the fruit is produced in immense quantities. Of English Morello type, but larger, not quite so acid, better quality, and produces larger crops. Ripens 10 days after Montmorencies. Always sells readily at premium prices. Dyehouse, Montmorency, and Suda Hardy give a long season of luscious money-making fruit and are the three best tart cherries. Introduced and Sold **ONLY** by Stark Bro's. Illustrated above.

Early Richmond *Early.* Ripe about a week later than Dyehouse but is not as good as Dyehouse. Medium size, clear, bright red; one of the best known standard sorts. Not so desirable as the Montmorency group.

Napoleon (**Royal Ann**) *Sweet. Late.* A large yellow, pink blushed sweet cherry. Largely grown. Trees hardy. Grown in all sweet cherry sections. Ours is one of the best strains obtainable. Illustrated above.

Royal Duke *Early.* Illustrated—best of all the Duke cherries—our strain is from a Colorado orchard noted for its wonderful cherries and is of superior value. Large, light red, rich, juicy.

Other Varieties

In addition to the varieties described in this book we also offer Royal Ann, Governor Wood, and Windsor. See Price List and Page 24.

Sold ONLY by Stark

STARK GOLD

The FIRST HARDY Sweet Cherry

Early Summer. The New **HARDY** Sweet Cherry. Discovered by us up north on the Nebraska farm of S. J. Thomas, Richardson Co., Neb. **All trees propagated direct from specially Selected RECORD-BEARING Parent Tree propagated direct from the Original Tree.** Stark Gold has proved to be the long-looked for **Hardy Sweet Cherry.** Its Originator reports: "Thermometer here in Richardson Co. often registers 40 below zero—average winter is 25 to 30 degrees below but this sweet cherry has NEVER MISSED A CROP!"

Year after year Stark Gold has borne tremendous crops East, West, North and South—even after 25 degrees below zero—the trees bowed almost to the ground with their golden loads of beautiful, luscious, meaty, sweet as sugar fruit.

This Sweet Cherry is large, glossy—of almost transparent, pure lustrous golden color—with superbly rich quality. Ripens about 2 weeks **after Early Richmond**—but hangs tenaciously to the tree—and in the home orchard can be used from the tree 10 days after ripening.

The tree is remarkably strong grower, regular and heavy bearer, succeeds splendidly in any ordinary well-drained soil.

Gold Cherries Fool the Birds

The famous Benj. Wallace Douglas, Orchardist and Author, declared in a recent article: "Stark Gold Cherry is the outstanding cherry for the home orchard. Furthermore, **the birds do not eat them. Evidently they think from the color that the fruit is not ripe enough to eat."**

MONTMORENCY STARK—King of ALL Tart Cherries

Finest Tart Cherry—Ripens about week after Early Richmond. Largest of **ALL** Montmorencies. All our trees are propagated from a RECORD-BEARING Parent Tree that is far better, stronger than usual Montmorency (Ordinaire), in our far-famed Test Orchard.

Fruit is largest of all the "sour" cherries—and is NOT really sour, but possessed of a tangful tartness—refreshing and luscious—flesh is firm—ships perfectly. Delicious, fresh and for pies, preserves, cobblers, puddings and other good eats.

The Trees are strong, disease-resistant, less affected by wet weather, hardy, bloom late and are sure, young bearers (often **fruit at 2 years** old). Cherries are of semi-dwarfish growth, and make ideal fillers for apple orchards.

All our cherry trees are grown in the best cherry soil on the finest root stocks in America. These roots are produced by our experts by the methods brought over from France by Mr. Stark years ago and improved upon by us since. This is the secret of their greater vitality, younger bearing and longer life.

Stark Improved LAMBERT—Largest Black Sweet Cherry

Early Summer. Ox-Heart type. Largest Black-Red Sweet Cherry, except our Burbank's Black Giant. All trees propagated direct from **HARDY** Record-Bearing Parent Tree discovered in our noted Test Orchards where it has borne every year and shows a vast improvement in hardiness and regular, heavy bearing **over ALL other Lambert trees.** Leads, too, in size of fruit, gallons per tree, vigor and **HARDINESS,** having **produced heavy crops after 24 degrees below zero.**

These cherries are dark, purplish red—almost jet black when full ripe. Skin is glossy but of good shipping toughness. Flesh firm, rich, deliciously sweet, juicy—**supreme quality.** Largest, showiest of all sweet cherries. Ripens about a week before Stark Gold.

*Date*_____ **STARK BRO'S NURSERIES, Louisiana, Mo.**

Subject to terms and conditions of your current Price List and the following Agreement, ship Nursery Stock as listed, for which I enclose $_____

The following agreement, between the undersigned and Stark Brothers Nurseries and Orchards Company, of Louisiana, Missouri, refers to the purchase by the undersigned of STARKING (Trade-Mark) (Stark Bro's Double-Red Delicious) apple trees and (or) GOLDEN DELICIOUS (Trade-Mark) apple trees and (or) STAYMARED (Trade-Mark) apple trees and (or) HAL-BERTA GIANT (Trade-Mark) peach trees and (or) any of the LUTHER BURBANK NEW TREE OR PLANT VARIETIES. Owing to the great expense of the wide-spread testing and investigation of these valuable trees and plants, and the great cost of their introduction, Stark Brothers Nurseries and Orchards Company is protecting itself as well as the public from the imposition and substitution often practiced by unscrupulous dealers. This is intended to prevent fakers from misbranding and marketing inferior fruits as genuine. Furthermore, this will enable growers who purchase Genuine Stark Trees or plants of the above named varieties to reap the reward of the high price on the markets for the fruit of these high quality trees and plants without having the damaging influence of bogus and inferior sorts which may be attempted to be marketed as genuine. Thus the reputation for long keeping, high quality and big profits of these fruits will be maintained and protected by the cooperation of Stark Brothers Nurseries and Orchards Company and the purchasers of any of the above named varieties. Therefore, in consideration of the agreement of the undersigned not to give away or sell or permit anyone else to give away or sell or to take these STARKING (Trade-Mark) apple trees and (or) GOLDEN DELICIOUS (Trade-Mark) apple trees and (or) STAYMARED (Trade-Mark) apple trees and (or) HAL-BERTA GIANT (Trade-Mark) peach trees and (or) any of the LUTHER BURBANK NEW TREE OR PLANT VARIETIES or their progeny or scions, buds or cuttings from these trees herein mentioned or their progeny or any other STARKING (Trade-Mark) apple trees and (or) GOLDEN DELICIOUS (Trade-Mark) apple trees and (or) STAYMARED (Trade-Mark) apple trees and (or) HAL-BERTA GIANT (Trade-Mark) peach trees and (or) any of the LUTHER BURBANK NEW TREE OR PLANT VARIETIES or their progeny that may be furnished to the undersigned in the future by Stark Brothers Nurseries and Orchards Company for a period of twenty-five (25) years after any such trees and (or) plants are so furnished and the further consideration of the sale of any of the foregoing trees and (or) plants named in this purchase agreement, Stark Brothers Nurseries and Orchards Company, agrees to furnish the varieties named in this purchase agreement, which are herein ordered, to the undersigned. The undersigned agrees that in case of disposition of the property on which any of the varieties, named in this purchase agreement, are planted to make this agreement a condition of the transfer. In the event that any nursery stock sold by Seller Company proves untrue to name as labeled, Seller Company agrees, on satisfactory proof to it of such untrueness to name, to refill that portion of the order so proven to it to be untrue to name, or, at its option, to refund the purchase price paid therefor, and as the Seller Company does not give any warranty, express or implied, in respect to any nursery stock sold by it, the purchaser's, or any one else's damages, if any, for any breach of this contract, or any special contract herein contained, by Seller Company, shall be limited to the refilling of that portion of the order, or to the refunding of the purchase price paid therefor, as above stated. I have read, understand and hereby agree to all these agreements and terms of sale.
